Also an Account of the State of Religion and Religious Parties in England from 1640 to 1660* Thomas Lathbury, 1858 **Knowing Books** Christina Lupton, 2011-11-29 The eighteenth century has long been associated with realism and objective description modes of representation that deemphasize writing But in the middle decades of the century Christina Lupton observes authors described with surprising candor the material and economic facets of their own texts production In Knowing Books Lupton examines a variety of eighteenth century sources including sermons graffiti philosophical texts and magazines which illustrate the range and character of mid century experiments with words announcing their status as physical objects Books that know their own presence on the page and in the reader's hand become in Lupton's account tantalizing objects whose entertainment value competes with that of realist narrative Knowing Books introduces these mid eighteenth century works as

part of a long history of self conscious texts being greeted as fashionable objects Poststructuralist and Marxist approaches to literature celebrate the consciousness of writing and economic production as belonging to revolutionary understandings of the world but authors of the period under Lupton s gaze expose the facts of mediation without being revolutionary On the contrary their explication of economic and material processes shores up their claim to material autonomy and economic success Lupton uses media theory and close reading to suggest the desire of eighteenth century readers to attribute sentience to technologies and objects that entertain them Rather than a historical study of print technology Knowing Books offers a humanist interpretation of the will to cede agency to media This horizon of theoretical engagement makes Knowing Books at once an account of the least studied decades of the eighteenth century and a work of relevance for those interested in new attitudes toward media in the twenty first
