*Evaluation of Fire Flow Methodologies* Matthew E. Benfer, Joseph L. Scheffey, 2015-08-08 This SpringerBrief offers careful assessments of the appropriateness and effectiveness of currently available methodologies for fire flow It explains the water supply requirements for firefighting including rate of flow the residual pressure required at that flow and the duration that is necessary to control a major fire in a specific structure First reviewing existing fire flow calculation methodologies in the U S and globally the authors determine the new information necessary to validate the existing fire flow calculation methodologies After identifying 19 methods from the U S UK France Germany the Netherlands New England and Canada two types of methods are evaluated those for building planning based on fire and building code requirements and those for on scene fire service use Building planning methods are also examined including an explanation of the range of building variables that determine fire flow A survey form for fire departments is provided to help fire departments identify key predictive features based on construction and building parameters Researchers and professionals in fire engineering will find the recommendations in *Evaluation of Fire Flow Methodologies* valuable      Attività ricettive: il progetto antincendio Filippo Cosi, 2017-05-23 L ebook *Attività Ricettive il progetto antincendio* costituisce il secondo appuntamento della Collana Tecnicamente dedicato espressamente al tema della Progettazione Antincendio In questo E book viene affrontato in particolare il tema della progettazione della sicurezza antincendio dei fabbricati adibiti ad Attività Ricettive Cos come la prima uscita dedicata al tema della progettazione antincendio dei fabbricati adibiti ad Ufficio anche questa pubblicazione strutturata in modo da costituire una linea guida per i progettisti nella predisposizione della relazione tecnica antincendio Una prima parte dell E book descrive l evoluzione della normativa antincendio che ha visto negli ultimi mesi la pubblicazione del Codice di prevenzione incendi e della nuova Regola tecnica verticale sulle attività ricettive Nello svolgimento dell attività professionale in questo particolare periodo storico caratterizzato da un continuo aggiornamento normativo ci si trova a volte di fronte ad un bivio e bisogna decidere quale approccio progettuale sia più conveniente seguire prescrittivo oppure prestazionale      *Attività Uffici: Progetto Antincendio* Filippo Cosi, 2017-04-14 In questo E book viene affrontato il tema della progettazione della sicurezza antincendio dei fabbricati adibiti ad attività di ufficio La pubblicazione strutturata in modo da costituire una linea guida per i progettisti nella predisposizione della relazione tecnica antincendio Una prima parte dell E

book descrive l'evoluzione della normativa antincendio che ha visto negli ultimi mesi la pubblicazione del Codice di prevenzione incendi e della nuova Regola tecnica verticale sulle attività di ufficio. Nello svolgimento dell'attività professionale in questo particolare periodo storico caratterizzato da un continuo aggiornamento normativo ci si trova a volte di fronte ad un bivio e bisogna decidere quale approccio progettuale sia più conveniente seguire. Per questo motivo le successive sezioni dell'Ebook affrontano la progettazione di un'attività di ufficio mediante tre impostazioni progettuali differenti. Le regole tecniche tradizionali in particolare il D.M. 22 febbraio 2006, il Codice di prevenzione incendi integrato dalla nuova RTV del 2016, la Fire Safety Engineering. Si tenga conto che le prime due metodologie sono alternative tra di loro mentre la FSE può essere applicata nel caso in cui sia necessario chiedere una deroga ad una particolare misura prevista dalla norma. Pertanto la FSE è stata presa in considerazione per sviluppare alcuni particolari aspetti della progettazione e non l'intero progetto. Al fine di predisporre una linea guida organica che affrontasse tutti gli aspetti della sicurezza antincendio, è stato descritto un ipotetico progetto di un fabbricato adibito ad uffici. In particolare si tratta di un fabbricato progettato qualche anno fa dall'autore secondo le norme tradizionali che risulta attualmente realizzato e già in esercizio. Il fabbricato in oggetto ospita gli uffici direzionali di un'importante Società multinazionale con base nel capoluogo piemontese. Al fine di fornire una linea guida applicabile anche a casi diversi da quello in oggetto, alcuni aspetti del progetto sono stati volutamente alterati per affrontare anche alcune tematiche particolari che in realtà non erano presenti nell'edificio realizzato. L'intera sezione che descrive la progettazione secondo il Codice, pertanto, è un progetto virtuale in quanto è stata redatta quando ormai l'edificio preso ad esempio era stato realizzato, ma essa riveste particolare importanza in relazione allo scopo della presente pubblicazione.
