It also provides an introduction to some of the essential foundations of a modern undergraduate finance qualification, including the nature of financial institutions, markets and economic policy that shape the opportunities and decisions that individuals face; the range of financial assets available to households; the risk-return trade-off; basics of portfolio construction and impact of tax; the importance of the efficient market hypothesis and modern portfolio theory in shaping investment strategies; and the limitations of these approaches. Behavioural finance is a key to understanding factors influencing individual and market perceptions and actions. Using financial data to inform investment selection and to create financial management tools that can aid decision making. A comprehensive companion website accompanies the text to enhance students' learning and includes answers to the end of chapter questions.
