

What to Do in a HazMat Emergency

Read labels and MSDSs so you know the physical and health hazards of the materials you work with. If there is a leak, spill, fire, or explosion:

- Call 911 and any other necessary emergency response personnel.
- Evacuate the area.
- Remove contaminated clothing immediately.
- Eyes: Flush with water for 15 minutes.
- Inhalation: Get victim to fresh air. Administer artificial respiration or CPR if necessary.
- Skin: Decontaminate; get medical assistance; call local poison center.
- Have MSDS information ready for emergency personnel.

Medical Emergencies

The situations discussed so far are life-threatening and need immediate action. You are far more likely, however, to encounter medical emergencies that are not immediately life-threatening but will require quick action on your part. Then you should do a **Secondary Survey**.

The Secondary Survey

If the victim is conscious, interview the victim and/or bystanders.

Ask:

- What happened?
- Do you have any pain?
- Do you have any medical problems?
- Are you taking any medications?
- Do you have any allergies?
- Check vital signs: pulse, respiration, skin color, and temperature. Recheck every 5 minutes.
