

POE Final Exam Study Guide

Simple Machines - IMA: Ideal Mechanical Advantage = Distance effort moves / distance load moves - AMA: Actual Mechanical Advantage = Load / Effort - Efficiency = AMA / IMA x 100% Nothing in the real world is more than 100% efficient. - Classification of Levers: Class 1, fulcrum is in the middle, class 2 load is in the middle, class 3 effort is in the middle - IMA of a lever: Length of effort arm/ length of load arm - IMA of a wheel and axle: radius of effort arm/ radius of load arm - IMA of a screw: circumference / pitch of screw (inches per thread) = $\pi d/P$ - IMA of an inclined plane: Length of sloped side of the ramp/ height of ramp - IMA of a wedge: Length of sloped side of the wedge/ width of the wedge - IMA of a pulley: Number of strands supporting the load. - Compound Machines: $MA_{total} = MA_A \times MA_C$	Energy: Energy source classifications: Nonrenewable: can be used up; oil, coal, uranium. Renewable: more can be made; bio fuels, plants, animals Unrenewable: we don't do anything to make more; solar, wind, hydro-electric. (many books combine unrenewable and renewable) Work: Force times the distance. Power: Work per unit time or Work/Time Hydrogen Fuel: - Hydrogen fuel cells combine hydrogen and oxygen to create electricity. - They create no pollution, only water. - It is an emerging technology with many issues such as storage and distribution.
Gears, sprockets and drive pulleys These machines transform rotational energy by changing position, rotational directions, speed and torque. ω is rotational speed (rpm) τ is torque (in lbs. or Nm) - Gear Ratio: (GR) = Number of teeth_{load} / number of teeth_{driver} = N_L/N_D - GR = $N_D/N_L = D_D/D_L = \omega_D / \omega_L = \omega_D / \omega_L$ - Sprockets use chains: noisier, more expensive, stronger, need lubrication - Drive pulleys use belts: quieter, cheaper, weaker, no lubrication	Electricity: Voltage: (abbr. V or E) – units are volts(V): Electric motor force: pressure or force of electricity Current: (abbr. I) – units are amps (A): flow of electrons Resistance: (abbr. R) – units are Ohms (Ω): resistance to current flow Ohm's law: $V = I \times R$ Power: $P = V \times I$ Series Resistors: One path for current – $R_{total} = R_1 + R_2$ Parallel Resistors: Multiple paths for current – $1/R_{total} = 1/R_1 + 1/R_2$ or $R_{total} = R_1 \times R_2 / (R_1 + R_2)$ (22%)
Thermodynamics Matter is made up of molecules in motion (kinetic energy) An increase in temperature increases motion Absolute Zero occurs when all kinetic energy is removed from a object 0 K = -273° C 1st law of thermodynamics: Energy cannot be created or destroyed. 2nd law of thermodynamics: thermal energy moves from hot to cold – Entropy (measure of disorder of energy) always increases. 1st law of thermodynamics: Energy cannot be created or destroyed. Thermal energy can be transferred: convection (moving fluids), conduction (touching objects) or radiation (electromagnetic waves through space or air). Rate of transfer: $P = A \times \Delta T / R$ value = $k \times A \times \Delta T / L$, where the r-value is the thermal resistance, T is temperature, A is area, L is length and k is thermal conductivity. Heat Energy transfer: $Q = m \times C_p \times \Delta T$ where C_p is the specific heat capacity of a material and m is the mass of the object Multiple Layers of Insulation: Add the r-values of multiple layers to get the total r-value.	Design Process Define a Problem: Identify a problem that exists. Determine the root cause. Gather information. Brainstorm: Present ideas in group. Generate and record ideas. Seek quantity not quality. Keep the most ideas through rapidly discard solutions. Research and Generate Ideas: Analyze the reasons for the need, want, or problem. Investigate who or what it is that is affected, and consider the need, want, or problem from their perspective. Research any existing solutions, and identify why they are not adequate or appropriate. Listen to clients to solve problems that they have discovered. Perform market research to determine if a want or need exists and determine the development of a design solution. Identify Criteria and Specify Constraints: Identify the end user if the client is not. Redefine the problem to the agreement of both client and engineer. Identify what the solution must do, and the degree to which it will be pursued. Identify the limitations within which the engineer must perform his/her duties. Compile the information into a design brief. Explore Possibilities: Initiate further development of brainstorming ideas with constraints and tradeoffs considered. Explore alternative ideas based on further knowledge and technology. Develop a Design Proposal: Develop detailed and annotated sketches. Determine the type(s) of material from which the solution will be constructed. Make computer models. Create technical drawings from the computer model(s). Make a Model or Prototype: Make study models (scaled models or mock-ups). Fabricate a functional prototype. Test and Evaluate the Design using Specifications: Test the prototype under controlled conditions. Test the prototype under actual conditions. Record the results. Evaluate results to determine if problems exist and further work is needed. Refine the Design: Reassess the validity of the design criteria and make adjustments to the design brief, if necessary. Work through the design process until the solution satisfies the design criteria. Update the documentation of the final solution. Create or Make Solutions: Determine Custom/Mass Production. Consider packaging. Communicate Processes and Results: Present oral presentations with visual aids (computer generated slide shows, models, prototypes). Develop written reports with appropriate graphic documentation (charts, graphs, technical drawings, renderings, etc.). Market the Product. Distribute.
Statics Newton's First Law of Motion (law of inertia): An object in a state of rest or uniform motion will continue to be so unless acted upon by another force. Newton's Second Law of Motion: The acceleration of an object is proportional to the net force acting on the object and inversely proportional to the object's mass. ($F=MA$) Newton's Third Law of Motion: For every action force, there is an equal and opposite reaction force. Static Equilibrium: A condition where there are no net external forces acting upon a particle or rigid body and the body remains at rest or continues at a constant velocity. Σ Moments = 0, Σ Forces in x direction = 0, and Σ Forces in y direction = 0 Moment: the rotational forces acting on an object = Force * perpendicular distance. Centroid: is the center of mass of an object and can be calculated from its dimensions. - Square: $\bar{x} = \frac{1}{3} \text{ base}$, $\bar{y} = \frac{1}{3} \text{ height}$ - Square: $\bar{x} = \frac{1}{3} \text{ base}$, $\bar{y} = \frac{1}{3} \text{ height}$ - Square: $\bar{x} = \text{radius}$, $\bar{y} = (4 \times \text{radius}) / (3 \times \pi)$ Centroid of compound shapes: $\bar{x} = \Sigma (x_i \times A_i) / \Sigma A_i$, where x_i is the centroid of each shape and A_i is the area of each shape. Moment of Inertia: describes the stiffness of a beam due to its cross section $I = bh^3/12$ for a rectangular cross section with height of h and width of b Max Deflection: describes how much it can bend = $FL^3 / (48 EI)$ where F is the applied force, L is length, I is moment of inertia and E is the modulus of elasticity, a property of the material. Free Body Diagrams: illustrate forces acting upon a given body including applied and reaction and are a necessary step in solving for static equilibrium. Normal Force: a reaction force that is perpendicular to the surface the object touches. Vector Quantities: have both magnitude and direction and trigonometry can be used to break them down into x and y components. $F_x = F \times \cos(\theta)$ and $F_y = F \times \sin(\theta)$ and $\theta = \tan^{-1}(F_y/F_x)$ Solving for Static Equilibrium: - Assume the body is rigid. - Choose a rotational point (with most unknowns go through it) and solve for $\Sigma M = 0$ - Then solve for $\Sigma F_x = 0$, and $\Sigma F_y = 0$	Materials Materials: are the substances with which all objects are made, each with its own physical and chemical properties. Elements: one type of atom – cannot be broken down Compounds: multiple elements chemically bonded. Mixtures: multiple elements or compounds not chemically bonded. Material Classification: metallic, ceramic, organic, polymeric, and composite. Manufacturing Processes: such as machining, casting, molding, and joining convert raw materials into consumer goods. Recycling: an important consideration when choosing materials. Material selection: is based upon mechanical, thermal, electromagnetic, and chemical properties as well as cost.

Poe Study Guide Engineering

DJ Losen

Poe Study Guide Engineering:

Fuel your quest for knowledge with Learn from is thought-provoking masterpiece, **Poe Study Guide Engineering** . This educational ebook, conveniently sized in PDF (PDF Size: *), is a gateway to personal growth and intellectual stimulation. Immerse yourself in the enriching content curated to cater to every eager mind. Download now and embark on a learning journey that promises to expand your horizons. .

Poe Study Guide Engineering Introduction

Poe Study Guide Engineering Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Poe Study Guide Engineering Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Poe Study Guide Engineering : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Poe Study Guide Engineering : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Poe Study Guide Engineering Offers a diverse range of free eBooks across various genres. Poe Study Guide Engineering Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Poe Study Guide Engineering Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Poe Study Guide Engineering, especially related to Poe Study Guide Engineering, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Poe Study Guide Engineering, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Poe Study Guide Engineering books or magazines might include. Look for these in online stores or libraries. Remember that while Poe Study Guide Engineering, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Poe Study Guide Engineering eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Poe Study Guide Engineering full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Poe Study Guide Engineering eBooks, including some popular titles.

FAQs About Poe Study Guide Engineering Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Poe Study Guide Engineering is one of the best book in our library for free trial. We provide copy of Poe Study Guide Engineering in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Poe Study Guide Engineering. Where to download Poe Study Guide Engineering online for free? Are you looking for Poe Study Guide Engineering PDF? This is definitely going to save you time and cash in something you should think about.
