Standardized Guidelines by Building Type Siegfried Wyner, B.S., M.S., C.E.,2008-04-22 The computer revolution over the past 10 15 years in our country has feed to the permanent dependence of all fields of human activity on computer technology Based on my experience as a plan examines for all building documentations I find that is necessary a reform and improvement of the plan examination and approval process in all boroughs of this big city of N Y Because the

architects and engineers have the best knowledge of their documentations I have realized that their help is the most necessary to the real improvement of the verification process We have to help them in this hypothesis I considered necessary to create a DATA BASE of guidelines realized for different building types which will be a computerized flexible tool for all review and approved process which can be updated all the time in the future by adding new guidelines to the existing ones with the new and specific requirements regarding new zoning resolutions new code articles new memorandums and criteria s issued by the city department for the best development of this great city This was the fundamental idea for the creation a DATA BASE of guidelines which will help from the beginning of the process of creation of technical documentations and after in the long process of verification and approval for the execution of buildings in the city Certainly this collection of guidelines proposed in my 2 volumes does not include all of the possible building types zoning and code resolutions but in my opinion and based on my experience is the most important tool in this complex process of approval of new investments This tool can be used not only by designers of the documentations but by the expeditors plan examiners contractors and finally by the owners of the investments These two books will be a unified procedure for all the factors which contribute to the realization of investments I consider to mention and other benefits realized by this written DATA BASE A reduced work load in the department of building A uniform approach for all 5 boroughs in the verification and approval process A reduction of time for verification and approval An improvement in the quality of documentations presented for verification and approval The use of self certification will be increased by the confidence of designers for their documentations A remarkable reduction of people involved in this complex process A sensible reduction of the investment costs
