Handbook of Research on Network-Enabled IoT Applications for Smart City Services Reddy, K. Hemant Kumar, Roy, Diptendu Sinha, Mishra, Tapas Kumar, Hussain, Mir Wajahat, 2023-09-26 The rapid growth of IoT and its applications in smart cities pose significant challenges for academic scholars. The increasing number of interconnected devices and the massive amounts of data they generate strain traditional networks, leading to inefficiencies and security vulnerabilities. Additionally, the centralized control plane in Software Defined Networks (SDN) presents a single point of failure, hindering network performance, while IoT devices themselves are susceptible to attacks compromising user data and privacy. To address these pressing issues, *Network Enabled IoT Applications for Smart City Services* offers a compelling solution. Edited by Dr K Hemant Kumar Reddy, Dr Diptendu Sinha Roy, and Tapas Mishra, this book advocates leveraging SDN to handle high frequency data streams effectively. It also proposes the integration of blockchain technology to enhance security and reliability in IoT applications, offering a roadmap for scholars to improve network efficiency, security, and reliability in IoT and smart city domains. With their extensive expertise, the authors provide academic scholars with a comprehensive and innovative resource that inspires further research and development in this evolving field, enabling them to make significant contributions to the advancement of IoT and smart city technologies.
