Ecological Restoration: Wildfire Ecology Reference Manual Doug Knowling, 2016-10-10 Fire ecology is a scientific discipline concerned with natural processes involving fire in an ecosystem and the ecological effects the interactions between fire and the abiotic and biotic components of an ecosystem and the role of fire as an ecosystem process

Mechanism Design with Creo Elements/Pro 5.0 Kuang-Hua Chang, 2011 Mechanism Design with Creo Elements Pro 5.0 is designed to help you become familiar with Mechanism Design a module in the Creo Elements Pro formerly Pro ENGINEER software family which supports modeling and analysis or simulation of mechanisms in a virtual computer environment Capabilities in Mechanism Design allow users to simulate and visualize mechanism performance Using Mechanism Design early in the product development stage could prevent costly redesign due to design defects found in the physical testing phase therefore contributing to a more cost effective reliable and efficient product development process The book is written following a project based learning approach and covers the major concepts and frequently used commands required to advance readers from a novice to an intermediate level Basic concepts discussed include model creation such as body and joint definitions analysis type selection such as static assembly analysis kinematics and dynamics and results visualization The concepts are introduced using simple yet realistic examples Verifying the results obtained from computer simulation is extremely important One of the unique features of this textbook is the incorporation of theoretical discussions for kinematic and dynamic analyses in conjunction with simulation results obtained using Mechanism Design The theoretical discussions simply support the verification of simulation results rather than providing an in depth discussion on the subjects of kinematics and dynamics
