

Pro Choice Abortion: Because It's Safer

Introduction

Whether or not a women should be able to legally have an abortion in the United States is a very controversial issue. Abortion is the deliberate termination of a pregnancy. It became legal in 1973 after the deliberation of the supreme court case 'Roe vs. Wade'. Before then it was very hard for women to have abortions and many sought out doing it on their own. Since as early as the 13th century abortion has been considered homicide. As far as current laws, abortion is legal throughout the United States but some states make it harder to get one. For example, Mississippi has some of the most restrictive laws which makes it the hardest state to get an abortion. In fact the state itself only has one functional Planned Parenthood clinic.

Other states like California and New Mexico have minimal restrictions. Many women who want to have an abortion have to travel across state lines because of their states' restrictive laws. For example a woman from Oklahoma had to travel 4 hours to Kansas just to have an abortion. Southern states typically have stricter abortion laws. States like Missouri and Mississippi only have one abortion clinic in the whole state. Other states like California and New York have a large amount of abortion clinics. Great intro! Informative and detailed, sets reader up to know enough to get into perspectives.

Main Body of Paper

Abortion is currently, and has been throughout the 21st Century, a controversial issue.

Primarily there have two main sides the argument, pro choice and pro life. Majority of the reasoning on the pro choice is that a woman should be able to have the right to do what she wants with her body. The U.S. Supreme court has also declared the right to abort as a "fundamental right" which is described as a basic human right. Other examples of fundamental rights are privacy and procreation. A lot people also explain that there are many reasons as to why a woman may need to have an abortion. (look at how the sentence before this is worded) Medical complications for the mother and baby may be an issue or a woman may simply not have the means to take care of a child. The pro life side of the argument says that the fetus is a human being and they should have the right of life. A baby should not be terminated simply because a woman is not ready to have a child. To them abortion is considered murder because you are terminating one's life. Another pro life argument is that human life begins at conception so a baby has the right to live just like any other person. Well done paragraph on two sides of abortion argument

Religious Beliefs on Abortion and its Impact on Abortion Law in the U.S.

Religious perspectives also contribute to whether or not a woman gets an abortion, which in the end would affect her health. In those religions in which a woman is banned from having an abortion, the health effects of having an abortion are more negative.
