**Testing the Purchasing Power Parity (PPP) in West and Central Africa** Mr. Abdoul A Wane, Carlos de Resende, Jing Xie, 2025-06-13 This paper employs various empirical methods to test the Purchasing Power Parity PPP hypothesis in West and Central Africa considering countries within the WAEMU CEMAC CFA and ECOWAS currency zones and four possible numeraire currencies U S dollar euro renminbi and the CFA franc Using panel and single country unit root cointegration error correction techniques our findings indicate that the numeraire currency matters for evidence in favor of PPP Results show slightly stronger evidence when the euro is used as the reference compared to other numeraire currencies although results vary across different methods Evidence for PPP is also stronger across the currency zones after the 1994 devaluation of the CFA franc when evidence for PPP using the renminbi as reference is also stronger suggesting an increasing importance of the renminbi for the economies in West and Central Africa The paper documents significant differences in price dynamics for the CEMAC and the WAEMU the two components of the CFA zone with stronger evidence for PPP found for the WAEMU and reversal speed to PPP faster than the 2 3 years found in the literature Results also indicate that real exchange rates of the currency zones revert to PPP mainly through adjustments of foreign prices expressed in domestic currencies which may result from changes in nominal exchange rates of the reference currencies or foreign prices and less so via adjustments in domestic prices

Das,2015-10-07 This book discusses equi quantile values and their use in generating decision alternatives under the twofold complexities of uncertainty and dependence offering scope for surrogating between two alternative portfolios when they are correlated The book begins with a discussion on components of rationality and learning models as indispensable concepts in decision making processes It identifies three fold complexities in such processes uncertainty dependence and dynamism The book is a novel attempt to seek tangible solutions for such decision problems To do so four hundred tables of bi quantile pairs are presented for carefully chosen grids In fact it is a two variable generalization of the inverse normal integral table which is used in obtaining bivariate normal quantile pairs for the given values of probability and correlation When making decisions only two of them have to be taken at a time These tables are essential tools for decision making under risk and dependence and offer scope for delving up to a single step of dynamism The book subsequently addresses averments dealing with applications and advantages The content is useful to empirical scientists and risk oriented decision makers who are often required to make choices on the basis of pairs of variables The book also helps simulators seeking valid confidence intervals for their estimates and particle physicists looking for condensed confidence intervals for Higgs Boson utilizing the Bose Einstein correlation given the magnitude of such correlations Entrepreneurs and investors as well as students of management statistics economics and econometrics psychology psychometrics and psychographics social sciences geographic information system geology agricultural and veterinary sciences medical sciences and diagnostics and remote sensing will also find the book very useful      *Self-Help to CBSE Mathematics 9 (Solutions of RD Sharma) [For 2022 Examinations]* I.S.
