Structure of the Lesson

I have broken down the lesson into timelines that focus on different activities. First, this structure will help me stay organized and focused during the lesson. Thus, I will use the lesson's allocated time sufficiently. Second, the structure will ensure the lesson contributes to the big idea of teaching the four seasons, towards which I will be working. In particular, each activity will build towards understanding the topic (Fujii, 2016). Third, the plan will help me consider, prepare and gather all the materials I will need for the lesson.

Fourth, I have structured the lesson to include both teacher and student input to foster student participation and interaction. Moreover, according to Fujii (2016), the most effective way to promote learning is to engage students actively in the process. I particular, I have included the flashcard game and the group activities that will engage the children. Additionally, this structure will help me consider the needs of all the students. For example, setting aside time for the students, to match the correct season with the correct weather individually, will help me meet their unique needs adequately. Finally, I have included a concluding session that will wrap up the lesson that will ensure the children remember what I have taught during the lesson.

The reason behind Choosing the Topic

The topic chosen is the four seasons. I have chosen this topic because it is the best topic to teach children about the passage of time and change in weather we experience during the year. The students will learn the seasons of the year and the adjectives associated with each season such as rainy for spring, hot for summer, windy for autumn, and cold for winter.

What I understand about this topic concerning my learners is that, while they may be familiar with the changes in weather during the year, they may not really know how to name each season accordingly. Additionally, the children may not know which weather condition relates to which season.

Nevertheless, this topic may present various challenges. First, the students may find it difficult to pronounce the new words. Second, they may lack the motivation to learn new vocabulary. Additionally, the topic presents disruptive students that will lower the learning opportunities for other students and even hamper my teaching. Finally, the students may find it difficult to match adjectives with seasons mostly while working individually.

The contribution of each Activity

The first activity will be warmer. This activity will connect the students to the prior lesson on colors. The students will learn to associate these colors with the seasons. The presentation stage, which is the main activity, will involve using the flashcards to present the four seasons and adjectives. Mainly, this activity will help the students learn the new vocabulary and its pronunciation. In this
