Search Stefan Weitz, 2016-11-03 Search is as old as language We've always needed to find something in the jumble of human creation The first web was nothing more than passing verbal histories down the generations so others could find and remember how not to get eaten the first search used the power of written language to build simple indexes in printed books leading to the Dewey Decimal system and reverse indices in more modern times Then digital happened Besides having profound societal impacts it also made the act of searching almost impossibly complex for both engines and searchers Information isn't just words it is pictures videos thoughts tagged with geocode data routes physical world data and increasingly the machines themselves reporting their condition and listening to others Search How the Data Explosion Makes Us Smarter holds up a mirror to our time to see if search can keep up Author Stefan Weitz explores the idea of access to help readers understand how we are inventing new ways to search and access data through devices in more places and with more capabilities We are at the cusp of imbuing our generation with superpowers but only if we fundamentally rethink what search is how people can use it and what we should demand of it Search How The Data Explosion Makes Us Smarter is the first title from GreenHouse Collection Created by the founders of Insight Labs the world's first philanthropic think tank GreenHouse Collection features books that encourage deeper exploration and inquiry to inform new models for social good

Machine Learning, Optimization, and Data Science Giuseppe Nicosia, Varun Ojha, Emanuele La Malfa, Giorgio Jansen, Vincenzo Sciacca, Panos Pardalos, Giovanni Giuffrida, Renato Umetsu, 2021-01-07 This two volume set LNCS 12565 and 12566 constitutes the refereed proceedings of the 6th International Conference on Machine Learning Optimization and Data Science LOD 2020 held in Siena Italy in July 2020 The total of 116 full papers presented in this two volume post conference proceedings set was carefully reviewed and selected from 209 submissions These research articles were written by leading scientists in the fields of machine learning artificial intelligence reinforcement learning computational optimization and data science presenting a substantial array of ideas technologies algorithms methods and applications
