- These different formulas throughout were selected, with minor changes, for the continuously updated presentation both in the paper version and in the online version. These points are in line with what is said in a number of other documents in the field, including the last version of the *Handbook of Mathematics*, published under the name "The mathematics environment of the mathematician's workstation" (see <http://www.math.ucdavis.edu/~math4all/>), which emphasizes, among other things, the importance of the mathematics environment in the development of the mathematics profession. The authors also mention:

- However, there is also the concern that students completely dependent on the teacher for motivation is a negative transfer to a foreign language context where the students are part of the social and community life constructed by the language. As an alternative, I am going to investigate the strategy of a self-motivating student, and present there and compare with a collective, classroom construction. This I will achieve, but please acknowledge for the research collection and research team. I will leave you to follow.
