Online Intercultural Exchange Robert O'Dowd, Tim Lewis, 2016-03-31 This volume provides a state of the art overview of Online Intercultural Exchange OIE in university education and demonstrates how educators can use OIE to address current challenges in university contexts such as internationalisation virtual mobility and intercultural foreign language education Since the 1990s educators have been using virtual interaction to bring their classes into contact with geographically distant partner classes to create opportunities for authentic communication meaningful collaboration and first hand experience of working and learning with partners from other cultural backgrounds Online exchange projects of this nature can contribute to the development of learner autonomy linguistic accuracy intercultural awareness intercultural skills and electronic literacies Online Intercultural Exchange has now reached a stage where it is moving beyond individual classroom initiatives and is assuming a role as a major tool for internationalization intercultural development and virtual mobility in universities around the globe This volume reports qualitative and quantitative findings on the impact of OIE on universities in Europe and elsewhere and offers comprehensive guidance on using OIE at both pedagogical and technological levels It provides theoretically informed accounts of Online Intercultural Exchanges which will be relevant to researchers in Computer Assisted Language Learning Computer Mediated Communication or Virtual Education Finally contributors offer a collection of practitioner authored and practically oriented case studies for the benefit of teachers of foreign languages or in other subject areas who wish to engage in developing the digital literacy and intercultural competences of their learners

Advances and New Trends in Environmental and Energy Informatics Jorge Marx Gomez, Michael Sonnenschein, Ute Vogel, Andreas Winter, Barbara Rapp, Nils Giesen, 2015-12-24 This book presents the latest findings and ongoing research in the field of green information systems and green information and communication technology ICT It provides insights into a whole range of cross cutting topics in ICT and environmental sciences as well as showcases how information and communication technologies allow environmental and energy efficiency issues to be handled effectively The papers presented in this book are a selection of extended and improved contributions to the 28th International Conference on Informatics for Environmental Protection dedicated to ICT for energy efficiency This book is essential and particularly worth reading for those who already gained basic knowledge and want to deepen and extend their expertise in the subjects mentioned above

Africa's digital future Ali Parry, Susara J. Jansen van Rensburg, 2021-12-31 The main thrust of this book is to examine whether Africa is in a position to benefit from the digital age given the continent's many development challenges and slow adoption of digital technologies While there is substantial literature on the digital economy and the quickening pace of the Fourth Industrial Revolution 4IR comparatively little research has been conducted on what the digital age means for Africa This book aims to close this research gap by using various qualitative and quantitative research methodologies to arrive at a cross section of original findings and perspectives on how Africa can capitalise on the benefits of digital developments

including their potential to create jobs and bring about more inclusive growth The book s main contribution is its coverage of a range of topics that will affect Africa s digital future including industrialisation global value chains transport and logistics trade facilitation labour market dynamics employment and education The theme of digital trade forms a backdrop to many of the chapters along with references to the COVID 19 pandemic The book acknowledges that although African countries should learn from international best practices they need to chart their own course according to their own particular circumstances By adopting a digital mindset countries should be able to diversify economically and extend their market reach across the continent Furthermore while Africa should be looking to the future and determining how digital technologies can become effective tools of sustainable development the continent has much catching up to do The New Student Guide, University of Virginia University of Virginia.
