[Crystal Reports .NET Programming](#) Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a NET application I ve been working with Crystal Reports since Visual Basic 3 and it s always been difficult to find technical information on report writing I spent a year and a half researching what NET programmers need to

successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected [InfoWorld](#) ,1997-08-18 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects [Mastering Business Analysis with Crystal Reports 9](#) Chris Tull,2004 This book discusses in detail the different features of the Crystal Reports software provides information on how to use Crystal Reports with different data sources and includes reference material on useful formulas and functions for business report writers

Special Edition Using Crystal Enterprise 8.5 Steve Lucas,Steven Lucas,Roger Sanborn,2002 The only reference available on Crystal Enterprise written by employees of Crystal Decisions creator of Crystal Enterprise Special Edition Using Crystal Enterprise 8 5 provides a comprehensive reference for the enterprise information delivery solution Crystal Enterprise This book will help readers understand where and how Crystal Enterprise can be applied to solve business problems Written as a guide through planning deploying administering and managing an enterprise reporting system based on Crystal Enterprise Using practical examples of how Crystal Enterprise can be deployed in complex network environments to solve some of the toughest reporting and information delivery challenges This book focuses on the entire solution that Crystal Enterprise and its supporting suite of report design tools Crystal Reports and Crystal Analysis Professional can deliver This book picks up where standard Crystal Reports books leave off it focuses on the actual delivery of interactive report content
