Regulating Cyber Technologies:

Privacy Vs Security Nathalie Rebe, 2023-01-30. Regulating cyber matters is a complex task as cyberspace is an intricate world full of new threats related to a person's identity, finance, and private information. Algorithm manipulation, hate crimes, cyber laundering, and data theft are strong menaces in the cyber world. New technologies are generating both privacy and security issues involving anonymity, cross-border transactions, virtual communications, and assets among others. This book is a collection of works by experts on cyber matters and legal considerations that need addressing in a timely manner. It comprises cross-disciplinary knowledge that is pooled to this end. Risk mitigation tools, including cyber risk management, data protection regulations, as well as ethical practice guidelines, are reviewed in detail. The regulatory issues associated with new technologies, along with emergent challenges in the field of cybersecurity that require improved regulatory frameworks, are considered. We probe ethical material and enforcement threats, thus revealing the inadequacy of current legal practices. To address these shortcomings, we propose new regulatory privacy and security guidelines that can be implemented to deal with the new technologies and cyber matters.

Marketing and Advertising in the Online-to-Offline (O2O) World Dinana, Hesham Osama, 2022-10-28. The field of marketing has changed for the good as the lines between the online and the offline worlds continue to blur and merge as new metaverses emerge. The evolution of online to offline and offline to online strategies and business models are transforming the research agenda for academicians and work practices for professionals. Further study on this evolution is required to fully understand the opportunities and future directions. Marketing and Advertising in the Online to Offline O2O World presents an insight into online and offline marketing strategies and practices and focuses on the emerging trend in the online and offline worlds. The book also explores the potential use of emerging technologies such as virtual reality, mixed reality, and big data analytics in different marketing and advertising functions. Covering key topics such as consumer behavior, brand equity, advertising, and brand performance, this reference work is ideal for business owners, industry professionals, managers, administrators, policymakers, researchers, academicians, scholars, practitioners, instructors, and students.
