Ratio Problem Solving

A ratio is a relationship between two or more quantities. They are usually written in the form a:b where a and b are two quantities. When problem solving with a ratio, the key facts that you need to know are:

- What is the ratio involved?
- What order are the quantities in the ratio?
- What is the total amount / what is the part of the total amount known?
- What are you trying to calculate?

As with all problem solving, there is **not one unique method** to solve a problem but we can use some techniques to help us solve problems with ratios.
