Problemes De Linguistique Generale 1:

Comparative Essays in Early Greek and Chinese Rational Thinking Jean-Paul Reding, 2017-03-02 This collection of essays by Reding in the emergent field of Sino Hellenic studies explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought right at the beginnings of philosophy in both cultures Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same phenomenon Rather than stressing the extreme differences between these two cultures as most other writings on these subjects Reding looks for the parameters that have to be restored to see the similarities Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece but from different starting points The book comprises seven essays moving thematically from conceptual analysis logic and categories to epistemology and ontology with an incursion in the field of comparative metaphorology One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples

Advances in Brand Semiotics & Discourse Analysis

George Rossolatos, 2023-03-07 This volume addresses some of the most important conceptual methodological and empirical challenges and opportunities with which the sister disciplines of semiotics and discourse analysis are mutually confronted in the context of considering new avenues of cross disciplinary application to distinctive branding research streams In continuation of the collective volume Handbook of Brand Semiotics Kassel University Press 2015 which sought to consolidate relevant scholarship and to identify the main territories that have been established at the cross roads between branding and semiotic research the current Advances in Brand Semiotics Discourse Analysis aims at accomplishing further strides in critical areas such as the exigency for reconsidering the aptness of existing semiotic theories in the face of the radically shifting co creative landscape of digital branding the benefits of systematically micro analyzing brand communities discourses by drawing on CAQDAS programs the combination of big data analytics with discourse theory in corpus analysis and the epistemological issues that emerge while combining discourse analysis with time hallowed marketing qualitative and quantitative research methods At the same time the volume hosts a resourceful blend of empirical studies and novel conceptual frameworks in burgeoning streams such as place heritage culinary personal and political branding

Manual of Deixis in Romance Languages Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume

will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world

The Fictions of Language and the Languages of Fiction Monika Fludernik, 2003-12-16 Monika Fludernik presents a detailed analysis of free indirect discourse as it relates to narrative theory and the crucial problematic of how speech and thought are represented in fiction Building on the insights of Ann Banfield's *Unspeakable Sentences* Fludernik radically extends Banfield's model to accommodate evidence from conversational narrative non fictional prose and literary works from Chaucer to the present Fludernik's model subsumes earlier insights into the forms and functions of quotation and aligns them with discourse strategies observable in the oral language Drawing on a vast range of literature she provides an invaluable resource for researchers in the field and introduces English readers to extensive work on the subject in German as well as comparing the free indirect discourse features of German French and English This study effectively repositions the whole area between literature and linguistics opening up a new set of questions in narrative theory

Language Contact in Europe Bridget Drinka, 2017-02-16 This book traces the spread of the perfect tense across Europe demonstrating the crucial role of language contact

Semantic Theories in Europe, 1830-1930 Brigitte Nerlich, 1992 It is widely believed by historians of linguistics that the 19th century was largely devoted to historical and comparative studies with the main emphasis on the discovery of soundlaws Syntax is typically portrayed as a mere sideline of these studies while semantics is seldom even mentioned If it comes into view at all it is usually assumed to have been confined to diachronic lexical semantics and the construction of some mostly ill conceived typologies of semantic change This book aims to destroy some of these prejudices and to show that in Europe semantics was an important although controversial area at that time Synchronic mechanisms of semantic change were discovered and increasing attention was paid to the context of the sentence to the speech situation and the users of the language From being a semantics of transformations a child of the biological geological paradigm of historical linguistics with its close links to etymology and lexicography the field matured into a semantics of comprehension and communication set within a general linguistics and closely related to the emerging fields of psychology and sociology

Reduced Parenthetical Clauses as Mitigators Stefan Schneider, 2007-02-01 While parentheticals attract constant attention they very rarely constitute the main subject of monographs This book provides a comprehensive account of reduced parenthetical clauses RPCs in three Romance languages Typical French RPCs are *je crois* *disons* *je dirais* *je pense* *je sais pas* and *je trouve* The research draws on 22 corpora of spoken French Italian and Spanish comprising a total amount of 3 975 500 words Its results consist in a typology of the relevant expressions in the three languages in the understanding of their pragmatic function and of the factors

influencing their use and in the description of their syntactic and prosodic properties Other findings are that RPCs are not restricted to statements but also occur in questions and that belief verbs are not as frequent as commonly assumed Although the book is about Romance parentheticals its conclusions are relevant for other languages *Semitic Languages* Gideon Goldenberg, 2013-01-10 This book offers a thorough authoritative account of the branches of Semitic among them Akkadian Aramaic Hebrew Arabic and Ethiopic It describes their history from ancient times to the present geographical distribution writing systems classification linguistic features distinctive characteristics and typological significance **Stéphane Mosès**

›**Displacements**‹ Ashraf Noor, 2024-05-06 Stéphane Mosès explores in *Displacements* the poetry of Paul Celan and the work of major German Jewish thinkers in the context of his distinction between normative and critical modernity The first part contains a translation of his book *Approches de Paul Celan* the third part a translation of his lecture series *Figures philosophiques de la modernité juive* and the central section contains alongside a text on Freud essays on Goethe and Benjamin that extend his analysis beyond the Jewish sphere while engaging with the questions of tradition and its fragmentation that he raises there Edited translated and with an Introduction by Ashraf Noor Henri Meschonnic Reader Meschonnic Henri Meschonnic, 2019-09-27 Henri Meschonnic was a linguist poet translator of the Bible and one of the most original French thinkers of his generation He strove throughout his career to reform the understanding of language and all that depends on it His work has had a shaping influence on a generation of scholars and here for the first time a selection of these are made available in English for a new generation of linguists and philosophers of language This Reader featuring fourteen texts covering the core concepts and topics of Meschonnic's theory will enrich enhance and challenge your understanding of language It explores his key ideas on poetics the poem rhythm discourse and his critique of the sign Meschonnic's vast oeuvre was continuously preoccupied with the question of a poetics of society he constantly connected the theory of language to its practice in various fields and interrogated what that means for society In exploring this fundamental question this book is central to the study and philosophy of language with rich repercussions in fields such as translation studies poetics and literary studies and in redefining notions such as rhythm modernity the poem and the subject 200 Years of Syntax Giorgio Graffi, 2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools Strategies of Difference in

Modern Poetry Pierre Lagayette,1998 This volume consists of a collection of essays mostly by European scholars on the ways modern poets have dealt with the crucial concept of difference in their practice of poetic composition What is examined here through the works of Stevens Roethke Yeats Pound Ammons Graham Laviera Reznikoff and Kinsella is the range of strategies used in poetry to convey a sense of disruption estrangement disturbance indeterminacy The aim is to track down the many kinds of difference that these poets works illustrate and the challenges they pose to the critic **Theatre Semiotics**

Arciero,Guido Bondolfi,Viridiana Mazzola,2018-05-30 This book addresses selected central questions in phenomenological psychology a discipline that investigates the experience of self that emerges over the course of an individual s life while also outlining a new method the formal indication as a means of accessing personal experience while remaining faithful to its uniqueness In phenomenological psychology the psyche no longer refers to an isolated self that remains unchanged by life s changing situations but is rather a phenomenon ipseity which manifests itself and constantly takes form over the course of a person s unique existence Thus the formal indication allows us to study the way in which ipseity relates to the world in different situations in a way that holds different meanings for different people Based on this new approach phenomenological psychotherapy marks a transition from a mode of grasping the truth about oneself through reflection to a mode of accessing the disclosure of self through a work of self transformation the care of self that requires the person to actually change her position on herself By putting forward this method the authors shed new light on the dynamic interplay between a person s historicity and uniqueness on the one hand and the related physiopathological mechanisms on the other providing evidence from the fields of genetics cardiology the neurosciences and psychiatry The book will appeal to a broad readership from psychiatrists psychologist and psychotherapists to researchers in these fields Advances in Natural Language Processing
