Grant Writing Tips for Nurses is a reader friendly primer that acknowledges that grant writing is an essential skill for today's nurse. The text follows a logical path moving from the reasons for seeking grant funding, the types of grants available and the structure and content for a typical grant proposal to the transit of grant proposals through internal institutional processes, deadlines and signatures and progress through review by the funding agency. Final chapters take a glance forward to future funding, ethical dilemmas related to grants and life after grants. An Essential Resource for Your Course 2009 294 pages

The Complexities of Care Sioban Nelson, Suzanne Gordon, 2012-05-15 Nursing everyone believes is the caring profession. Texts on caring line the walls of nursing schools and student shelves. Indeed, the discipline of nursing is often known as the caring science. Because of their caring reputation, nurses top the polls as the most trustworthy professionals. Yet in spite of what seems to be an endless outpouring of public support in almost every country in the world, nursing is under threat in the practice setting and in the academic sector. Indeed, its standing as a regulated profession is constantly challenged. In our view, this paradox is neither accidental nor natural but in great part the logical consequence of the fact that nurses and their organizations place such a heavy emphasis on nursing's and nurses' virtues rather than on their knowledge and concrete contributions from the Introduction. In a series of provocative essays, *The Complexities of Care* rejects the assumption that nursing work is primarily emotional and relational. The contributors, international experts on nursing, all argue that caring discourse in nursing is a dangerous oversimplification that has in fact created many dilemmas within the profession and in the health care system. This book offers a long overdue exploration of care at a pivotal moment in the history of health care. The ideas presented here will foster a critical debate that will assist nurses to better understand the nature and meaning of the nurse-patient relationship, confront challenges to their work and their profession, and deliver the services patients need now and into the future. *Writing Winning Proposals for Nurses and Health Care Professionals*
