UK Banks and the Lessons of the Great Financial Crisis Adam Barber, 2021-05-10 This book demonstrates the variation in the reaction of the UK's big four banks RBS Lloyds Barclays and HSBC to the Great Financial Crisis 2008 Over a decade on from the financial crisis this book asks have banks in the UK learned lessons from the crisis Bank learning in the UK after the Great Financial Crisis is something we need to know more about Whether banks are now safer and more likely to aid rather than disrupt the economy are important questions of social relevance Through a documentary analysis of Britain's big four banks in the post crisis decade 2008 2018 this book demonstrates that while some institutions have become more risk averse and display positive signs of learning others have shown little evidence of change The book uses notions of agency path dependency and structural competitive pressures to explain these inter bank variations of behaviour This book contributes to wider post crash structural debates about growth markets and regulatory reform showing how the agency of banks has played a vital role in driving the reform process

HC 728-I - Project Verde: Volume I Great Britain. Parliament. House of Commons. Treasury Committee, 2014 One of the most significant consequences of Co op Bank's near collapse from a public policy perspective was the collapse of Lloyds Banking Group's planned divestment under Project Verde Co op Bank's withdrawal forced Lloyds to resort to its fallback option of an Initial Public Offering The result is a new bank TSB which not having an existing banking presence of its own consists solely of the business divested by Lloyds Accordingly it has a personal current account market share not of 7 per cent but of 4.2 per cent There is a risk that a bank of this size might struggle to grow significantly and to act as a true challenger in the market Had Co op Bank's resulting capital shortfall been uncovered earlier it is likely that the bank would not have progressed so far with Verde As it was the rapid and late emergence of the capital problem led to Co op's withdrawal from the Verde process at a relatively late stage The Committee recommends that the FRC investigation and the independent inquiry into the events at Co op Bank consider the role of KPMG and the FSA in relation to the late emergence of loan impairment and IT losses On the basis of these findings the independent inquiry into the events at Co op Bank should also form a view on whether Co op's Verde bid could or should have been halted sooner While it may not have been fully transparent from the start that Co op Bank's bid was doomed to failure it was beset by problems from an early stage But it was not these problems that killed the deal it was the capital shortfall that emerged only late in the day It is important from every angle to determine why the capital shortfall was not uncovered earlier

United Kingdom International Monetary Fund. European Dept., 2014-07-28 KEY ISSUES The economy has rebounded strongly and prospects are promising Headwinds that previously held back the economy relating notably to credit conditions and confidence have eased Nonetheless sustaining strong growth will depend on a recovery in productivity growth and further demand rebalancing The housing market brings risks of financial vulnerabilities Sterling is moderately overvalued The overall policy mix is appropriate but policy settings might need to be adjusted quickly Effective monetary conditions are very supportive compensating for ongoing fiscal consolidation Accommodative monetary policy is appropriate for now given weak inflation pressures but policy might need to be adjusted quickly if inflation takes off Interest rate increases may also need to

be considered if macroprudential tools are insufficient to deal with financial stability risks from the housing market The authorities have recently implemented macroprudential measures including limiting the share of high loan to income mortgages lenders can issue establishing them as the primary defense against housing related risks They should stand ready to tighten these limits should current settings prove ineffective in reining in those risks A lasting solution to house price pressures requires measures to address insufficient supply Significant planning reforms have been undertaken but political consensus is needed to make further progress in this area High deficits and rising debt mean that fiscal consolidation needs to continue The pace and composition of deficit reduction over the near term is appropriate Further reducing the deficit over the medium term will be challenging both revenue and expenditure measures should be considered keeping in mind both equity and efficiency The financial sector is more robust the new financial architecture is settling in and significant changes have been made to banks liquidity backstops to adapt to changing needs Implementing macroprudential policy will be a test of the new architecture Some problems such as Too Important To Fail and bank misconduct persist and new challenges such as from shadow banking are emerging

Independent Commission on Banking final report Independent Commission on Banking, 2011-09-13 The Independent Commission on Banking's final recommendations aim to create a more stable and competitive basis for UK banking for the long term The result would be a banking system that is much less likely to cause or succumb to financial crises and the huge costs they bring is self-reliant so that the taxpayer does not have to bear the losses that banks make and is effective and efficient at providing the basic banking services of safeguarding retail deposits operating secure payments systems and efficiently channelling savings to productive investments in the economy Stability is crucial and UK banks should have more equity capital and loss absorbing debt beyond what has so far been internationally agreed and their retail banking activities should be structurally separated by a ring fence from wholesale and investment banking activities The Commission also address competition which has not been properly effective in UK retail banking They recommend a seamless switching system based on redirection for personal and small business current accounts free of cost and risk complemented by measures to enhance transparency The new Financial Conduct Authority should have a clear duty to promote effective competition Structural reform should be complete by the Basel implementation date of 2019 at the latest These reforms would result in better capitalised less leveraged banking more focused on the needs of savers and borrowers in the domestic economy At the same time UK banks would be free to flourish in global markets but without UK taxpayer support

Partners for Good Tom Levitt, 2016-05-13 After a century in which charities suspected the motives of cynical business

people and business people dismissed the contributions of amateur volunteers the two sectors are coming together today as never before The third sector has increased its business capacity through the experience gained from a decade of providing commissioned services to the public sector Society today expects employers to do more to engage with both communities and good causes and the business case for doing so can be and is being made But business also realises that charities do conscience better than they can and so co working is increasingly being sought In Partners for Good Tom Levitt points the way to successful partnerships at local national and international levels There is now even an agreed international standard on what constitutes the social responsibility obligations of organisations operating in all sectors in all parts of the world over and above international legal frameworks Sustainability today refers to the triple bottom line financial social environmental rather than being a green concept alone On the down side grants and other funding opportunities provided by governments to the third sector over the last ten years are suddenly ending and support structures are disappearing The incentives for forging successful and sustainable win win partnerships between businesses and charities in the new Big Society are therefore high however demanding the time scale on offer

Directors' Duties and Shareholder Litigation in the Wake of the Financial Crisis Joan Loughrey, 2013-01-01 This book takes us back to the financial crisis and asks should the directors of the financial institutions that caused the crisis be held responsible to their investors Loughrey s and her contributors analysis of that question and the suggestions to implement their proposals are insightful and timely This is a must read book for those of us who are still trying to determine how to avoid the next financial crisis Randall Thomas Vanderbilt Law School US The financial crisis revealed failings at board level at many financial institutions But despite calls for bank boards to be held to account there has been a remarkable paucity of litigation against bank directors for breach of their duties This book assesses whether the law relating to directors duties and shareholder litigation has contributed to this taking into account the changes to both that were introduced by the Companies Act 2006 With contributions from leading academics and practitioners the book examines the director s duty of care and skill the s 172 duty reporting obligations under s 417 of the Companies Act 2006 and shareholder litigation including the derivative action and just and equitable winding up It concludes that neither the common law nor the statutory duties and derivative action under the Companies Act 2006 function effectively to hold directors to account and analyses why this is so This detailed book will appeal to academics in company law and corporate governance as well as commercial law practitioners particularly those who specialize in company litigation
