Reinventing Management Julian Birkinshaw, 2012-04-25 The economic crisis was not just caused by a failure of regulation or economic policy it was a story of the failure of management in a fundamental sense a deeply flawed approach to management that encouraged bankers to pursue opportunities without regard for their long term consequences and to put their own interests ahead of those of their employers and their shareholders The revised edition of this best selling book shows convincingly that many of today's major economic problems in the west can be traced to a failure of management In this updated edition the author draws our attention to new examples of failed management from Rupert Murdoch's News Corp and the disaster at BP to the ongoing problems in financial services companies such as UBS and RBS Throughout the book the references and statistics have been updated to make this a current highly relevant analysis of the problems besetting modern business and how managers need to tackle them Reinventing the Regulation of Drugs Made from Biotechnology Bill Clinton, Al Gore, 1995 **Reinventing Project Management** Aaron J. Projects are the engines that drive innovation from idea to commercialization In fact the number of projects in most organizations today is expanding while operations is shrinking Yet since many companies still focus on operational excellence and efficiency most projects fail largely because conventional project management concepts cannot adapt to a dynamic business environment Moreover top managers neglect their company's project activity and line managers treat all their projects alike as part of operations Based on an unprecedented study of more than 600 projects in a variety of businesses and organizations around the globe *Reinventing Project Management* provides a new and highly adaptive model for planning and managing projects to achieve superior business results **Reinventing the Federal Food Safety System** United States.

Local and Regional Economies Gerald L. Gordon, 2011-09-28 Recent US economic history is rife with examples of cities and regions that have experienced significant decline. Many of those localities began to slide after decades even generations of feeling immune to economic disaster. Boeing and Kodak, the steel industry in Pittsburgh and the automotive industry in Detroit all expected to make it golden into the distant future. Tapping into the available body of knowledge as well as through nearly 70 interviews, the experiences of those who lived and worked in those times in cities around the United States to identify the most effective strategies. *Reinventing Local and Regional Economies* delineates the dos and don'ts to observe in order to sustain economic vitality in any community. Written by Dr. Gerald Gordon, president and chief executive officer of the Economic Development Authority in Fairfax County, Virginia, the book explores lessons learned and examines the messages communities must be mindful of in order to ensure future economic stability. Drawing on more than 30 years of experience, Gordon identifies a set of foundational lessons that while they are not guarantees of success, certainly portend failure if ignored by local planners. Each chapter explores a different prerequisite and then applies it to several case studies of the reinvention of local and regional economies. Each of these basic components of economic growth will then be examined against the backgrounds of the many communities studied, thus permitting comparisons and contrasts to be drawn. A comparative analysis of results from one community to another across a wide range of case studies. This book puts into clear context the observations about what works not only in one locale but in communities with common features facing common issues and getting similar results. Using case studies and real world examples of successes and failures, Dr. Gordon provides the tools to develop a proactive strategy that positions your community for surviving and thriving regardless of external stresses and adverse economic conditions that may be out of your control.
