INTRODUCTION The Seabees of the United States Navy were born in the dark days following Pearl Harbor when the task of
building victory from defeat seemed almost insurmountable The Seabees were created in answer to a crucial demand for
builders who could fight Using sailors to build shore based facilities however was not a new idea Ancient Egyptians
Phoenicians Greeks and Romans did it In more recent times from the earliest days of the United States Navy sailors who were
handy with tools occasionally did minor construction chores at land bases After the 7 December 1941 Japanese attack on
Pearl Harbor and the United States entry into the war the use of civilian labor in war zones became impractical Under
international law civilians were not permitted to resist enemy military attack Resistance meant summary execution as
guerrillas The need for a militarized Naval Construction Force to build advance bases in the war zone was self evident
Therefore Rear Admiral Ben Moreell determined to activate organize and man Navy construction units On 28 December 1941
he requested specific authority to carry out this decision and on 5 January 1942 he gained authority from the Bureau of
Navigation to recruit men from the construction trades for assignment to a Naval Construction Regiment composed of three
Naval Construction Battalions This is the actual beginning of the renowned Seabees who obtained their designation from the
initial letters of Construction Battalion Admiral Moreell personally furnished them with their official motto Construiamus
