Building a Home Security System with Raspberry Pi Matthew Poole, 2015-12-28 Build your own sophisticated modular home security system using the popular Raspberry Pi board About This Book This book guides you through building a complete home security system with Raspberry Pi and helps you remotely access it from a mobile device over the Internet It covers the fundamentals of interfacing sensors and cameras with the Raspberry Pi so that you can connect it to the outside world It

follows a modular approach so that you can choose the modules and features you want for your customized home security system

Who This Book Is For This book is for anyone who is interested in building a modular home security system from scratch using a Raspberry Pi board basic electronics sensors and simple scripts This book is ideal for enthusiastic novice programmers electronics hobbyists and engineering professionals It would be great if you have some basic soldering skills in order to build some of the interface modules

What You Will Learn Understand the concepts behind alarm systems and intrusion detection devices Connect sensors and devices to the on board digital GPIO ports safely Monitor and control connected devices easily using Bash shell scripting Build an I O port expander using the I2C bus and connect sensors and anti tamper circuits Capture and store images using motion detectors and cameras Access and manage your system remotely from your mobile phone Receive intrusion alerts and images through your e mail Build a sophisticated multi zone alarm system

In Detail The Raspberry Pi is a powerful low cost credit card sized computer which lends itself perfectly as the controller for a sophisticated home security system Using the on board interfaces available the Raspberry Pi can be expanded to allow the connection of a virtually infinite number of security sensors and devices The Raspberry Pi has the processing power and interfaces available to build a sophisticated home security system but at a fraction of the cost of commercially available systems

Building a Home Security System with Raspberry Pi starts off by showing you the Raspberry Pi and how to set up the Linux based operating system It then guides you through connecting switch sensors and LEDs to the native GPIO connector safely and how to access them using simple Bash scripts As you dive further in you ll learn how to build an input output expansion board using the I2C interface and power supply allowing the connection of the large number of sensors needed for a typical home security setup In the later chapters of the book we ll look at more sophisticated topics such as adding cameras remotely accessing the system using your mobile phone receiving intrusion alerts and images by e mail and more By the end of the book you will be well versed with the use of Raspberry Pi to power a home based security system that sends message alerts whenever it is triggered and will be able to build a truly sophisticated and modular home security system You will also gain a good understanding of Raspberry Pi s ecosystem and be able to write the functions required for a security system

Style and approach This easy to follow guide comprises a series of projects where every chapter introduces a new concept and at the end of the book all these concepts are brought together to create an entire home security system This book features clear diagrams and code every step of the way

Home Security Vivian Capel,1997-07-22 Every reason now exists to make homes more secure the crime rate is increasing insurance companies are insisting on adequate protection and more householders are improving home security so criminals are seeking out the easier jobs one of which could be yours This book provides practical independent guidance It shows how burglars work and how to thwart them In a jargon free way the selection and installation of alarm systems are described in this practical guide for home owners

Electronic Protection and Security Systems Gerard Honey,1998-11-16 This book provides a concise guide to the selection design and installation

of the wide range of security systems in use in domestic public and commercial contexts The range of products covered includes intruder alarms fire alarms call systems access control vehicle protection emergency and security lighting closed circuit TV CCTV and intercoms Electronic Protection and Security Systems is essential reading for all security system installers and designers It is also an invaluable guide for managers selecting and supervising security systems local government police and security conscious householders and vehicle owners This book provides a wide ranging foundation for SITO NVQ students The second edition of this popular book has been updated to cover the latest technology in ID communication equipment fire alarm wiring techniques TV camera links wireless systems Paknet etc Gerard Honey s clear practical text draws on his wealth of experience designing and installing security and protection systems He is also the author of Intruder Alarms a comprehensive text for the SITO NVQs in that topic Includes latest technology Comprehensive practical guide
