**Climate Change Baffles Brains** L. Rowand Archer, 2019-09-04 We have now sunk to a depth where the restatement of the obvious is the duty of intelligent men George Orwell's words are worth repeating as climate warming alarmists promote doomsday scenarios that have no basis in science L Rowand Archer examines the lie of global warming and the motivations for it in this treatise that exposes the socialist agenda and fear mongering of the liberal left Lost in the propaganda is the fact that man made CO2 emissions have greened Earth transforming some former desert regions into verdant oases of greenery and contributing to record crop yields Instead of demonizing CO2 we should be praising CO2 for helping to feed the world Because weather is familiar to all it seems that everyone has a theory about what causes climate change and that makes it difficult to argue rationally about the real science behind climate change This book is intended to provide a nontechnical understanding of climate skepticism as argued by over 300 knowledgeable authors in their fields who question the notion that humankind is the major influence of climate change Get real answers to what is really happening in Climate Change Baffles Brains

Bravely challenging the Establishment consensus forensically argued Mail on Sunday The British government has embarked on an ambitious and legally binding climate change target reduce the country s greenhouse gas emissions to Net Zero by 2050 The Net Zero policy was subject to almost no parliamentary or public scrutiny and is universally approved by our political class But what will its consequences be Ross Clark argues that it is a terrible mistake an impractical hostage to fortune which will have massive downsides Achieving the target is predicated on the rapid development of technologies that are either non existent highly speculative or untested Clark shows that efforts to achieve the target will inevitably result in a huge hit to living standards which will clobber the poorest hardest and gift a massive geopolitical advantage to hostile superpowers such as China and Russia The unrealistic and rigid timetable it imposes could also result in our committing to technologies which turn out to be ineffective all while distracting ourselves from the far more important objective of adaptation This hard hitting polemic provides a timely critique of a potentially devastating political consensus which could hobble Britain s economy cost billions and not even be effective      **21st Century Homestead: Sustainable Agriculture**
