Physical Science Grade 12September 2014:

Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08 The 2010 astronomy and astrophysics decadal survey *New Worlds New Horizons* in Astronomy and Astrophysics laid out an exciting portfolio of recommended activities to guide the agencies research programs over the period 2012-2021. The newly constituted Committee on Astronomy and Astrophysics CAA is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington D C on March 28-30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting the CAA received a question from NASA about an upcoming Small Explorer SMEX mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX sized mission to justify a SMEX Announcement of Opportunity AO in 2018 or 2019 as is currently planned.

Spin Dynamics in Two-Dimensional Quantum Materials Marc Vila Tusell, 2021-11-10 This thesis focuses on the exploration of nontrivial spin dynamics in graphene based devices and topological materials using realistic theoretical models and state of the art quantum transport methodologies. The main outcomes of this work are: i) the analysis of the crossover from diffusive to ballistic spin transport regimes in ultraclean graphene nonlocal devices and ii) investigation of spin transport and spin dynamics phenomena such as the quantum spin Hall effect in novel topological materials such as monolayer Weyl semimetals WTe_2 and MoTe_2 . Indeed the ballistic spin transport results are key for further interpretation of ultraclean spintronic devices and will enable extracting precise values of spin diffusion lengths in diffusive transport and guide experiments in the quasi-ballistic regime. Furthermore the thesis provides an in-depth theoretical interpretation of puzzling huge measured efficiencies of the spin Hall effect in MoTe_2 as well as a prediction of a novel canted quantum spin Hall effect in WTe_2 with spins pointing in the yz plane.

Assessing the Risks of Integrating Unmanned Aircraft Systems (UAS) into the National Airspace System

National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Assessing the Risks of Unmanned Aircraft Systems (UAS) Integration, 2018-11-04 When discussing the risk of introducing drones into the National Airspace System it is necessary to consider the increase in risk to people in manned aircraft and on the ground as well as the various ways in which this new technology may reduce risk and save lives sometimes in ways that cannot readily be accounted for with current safety assessment processes. This report examines the various ways that risk can be defined and applied to integrating these Unmanned Aircraft Systems (UAS) into the National Airspace System managed by the Federal Aviation Administration (FAA). It also identifies needs for additional research and developmental opportunities in this field.

Practical Sports Coaching Christine Nash, 2014-11-24 Practical Sports Coaching is a thorough and engaging guide for all sports coaching students and practitioners. Drawing on real life

assessment outcomes *Neoliberalism Economic Policy and the Collapse of the Public Sector* Lionel D. Lyles
 PhD.,2018-07-13 My book demonstrates how classical liberalism was the foundation upon which Thomas Jefferson George Washington Alexander Hamilton and others wrote the Declaration of Independence Constitution and the Bills of Rights however it was rolled back by 1980 and replaced with neoliberalism which was championed by the Reagan Administration In short this ideology has one main aim and that is to shrink government cut the budgets of social programs and give away billions of taxpayer dollars to private business in the form of tax breaks During the Jindal administration and by the end of its first term more than 7 billion worth of tax breaks had been given away to private business A surplus of 1 billion left in the Louisiana treasury by outgoing governor Kathleen Blanco after Hurricane Katrina was given away by the end of the first two months of its first term Today the Louisiana legislature is currently facing a 650 million fiscal cliff and no doubt more budget cuts are in store for the Louisiana public sector *Nature and Environment: The Psychology of Its Benefits and Its Protection* Marc Glenn Berman,2017-04-20 Our Research Topic section entitled Nature and the environment The psychology of its benefits and its protection will have two main lines The first line of articles will center upon cutting edge research showing how interacting with nature can affect health well being and overall improve cognition and affect Articles in this line will stress in what ways nature can improve psychological functioning and health and also discuss the theories and evidence as to why nature can improve psychological functioning For this line we welcome submission of articles that discuss the psychological health and well being benefits from interacting with nature as well as submissions that focus on theoretical considerations and underlying mechanisms that lead to the restorative effects of interacting with nature Given that nature can have a positive impact on psychological functioning and overall health it is also important to understand the variables that facilitate people s recognition of environmental issues that can help foster a more positive attitude towards the preservation of nature This brings us to the second line of articles which will center upon the psychological mechanisms that make individuals more or less likely to accept the seriousness of environmental challenges such as climate change Given the new cutting edge research in this field we may be able to make individuals more proactive in the protection of the environment and more accepting of policy measures required to mitigate climate change We see this research topic as a way for psychological scientists to contribute substantially to an important area of public debate and policy For this line we welcome articles that will focus on ways in which people respond to various framings of policy relevant information and how morality may play into the individuals policy views that center on climate change and environmental protection **The Physics of Gamma-Ray Bursts** Bing Zhang,2019 A complete text on the physics of gamma ray bursts the most brilliant explosions since the Big Bang
