Parliament. House of Commons. Select Committee on Science and Technology, 2014 The risks and benefits of participating in screening programmes for conditions and diseases like cancer are not consistently communicated by either the NHS or private health care providers the Science and Technology Committee has warned in a new report It is calling on the Government to ensure that a standardised process to produce screening information is introduced and that better communications training is provided to health care professionals A recently revised breast cancer screening leaflet for the 50 70 age group with its more explicit focus on helping women make an informed choice about whether screening is right for them marks a step in the right direction However the inquiry found that the principles followed to revise this leaflet have not been applied to the communications developed by other NHS screening programmes The Committee recommends that steps are immediately taken by the Government's advisor on screening the UK National Screening Committee UK NSC to devise and implement a standard process for producing information that facilitates informed choice It also recommends a clarification of what informed choice means for potential screening participants so that different screening programmes can be more effectively evaluated on their delivery of it MPs are also calling on the Office for National Statistics to validate the statistics presented in NHS screening information to resolve disagreement and confusion over their accuracy      Super Bomb Ken Young, Warner R. Schilling, 2020-02-15 Super Bomb unveils the story of the events leading up to President Harry S Truman's 1950 decision to develop a super or hydrogen bomb That fateful decision and its immediate consequences are detailed in a diverse and complete account built on newly released archives and previously hidden contemporaneous interviews with more than sixty political military and scientific

figures who were involved in the decision Ken Young and Warner R Schilling present the expectations hopes and fears of the key individuals who lobbied for and against developing the H bomb They portray the conflicts that arose over the H bomb as rooted in the distinct interests of the Atomic Energy Commission the Los Alamos laboratory the Pentagon and State Department the Congress and the White House But as they clearly show once Truman made his decision in 1950 resistance to the H bomb opportunistically shifted to new debates about the development of tactical nuclear weapons continental air defense and other aspects of nuclear weapons policy What Super Bomb reveals is that in many ways the H bomb struggle was a proxy battle over the morality and effectiveness of strategic bombardment and the role and doctrine of the US Strategic Air Command

**Earth in Flames** Professor Department of Atmospheric and Oceanic Sciences and Laboratory for Atmospheric and Space Physics Owen Brian Toon, Alan Robock, Distinguished Professor Department of Environmental Sciences Alan Robock, 2025-06-16 Sixty six million years ago an asteroid as large as Mt Everest hit what is now the Yucatan Peninsula at a speed ten times faster than the fastest rifle bullet Debris from the impact blew into space re entered the atmosphere as a swarm of shooting stars that burned the global forests and grasslands leaving behind a thin global layer containing rock from the asteroid and from Mexico and smoke from the fires This layer marks one of the greatest extinctions in Earth history including not just dinosaurs but also fish plankton ammonites and plants making up about 75% of the known species The major culprits in these extinctions are loss of sunlight due to absorption by the smoke and decade long ice age temperatures A nuclear war with just a few hundred of the world's 12 000 nuclear weapons targeted on densely populated cities could plunge Earth into the same types of conditions that the dinosaurs experienced Even a war between India and Pakistan could kill 1 to 3 billion people from starvation due to agricultural failure while 6 billion people might starve following a war involving Russia NATO and the U S The book describes how the dinosaurs died and how their deaths parallel what might happen to people after a nuclear war The book reflects on the odds of future asteroid impacts how to stop them and ends with what the readers personally and together can do to prevent a nuclear war so that humans don't end up like the dinosaurs

Watts, 2018-12-03 Cratonic basins are large distinctive features of the continental crust They are preferentially developed on thick continental lithosphere are typically sub circular in shape and subside over periods of hundreds of millions of years They are also endowed with significant resources However in spite of their location in continental interiors and often well known geology the subsidence driving mechanism and tectonic setting of these basins remains controversial This volume presents both lithospheric and basin scale datasets acquired specifically to interrogate the tectonic process of cratonic basin formation Focused on the Silurian to Triassic Parna ba cratonic basin of Brazil the papers discuss the results of a multidisciplinary basin analysis project comprising new geophysical geological and geochemical data This unique dataset enables the characterization of the lithospheric crust and mantle beneath the Parna ba Basin constrains the detailed evolution of the basin itself and enables comparisons with cratonic basins globally Several convergent themes emerge providing new and powerful constraints for models of the driving mechanisms of these enigmatic basins
