Indians of Mexico's Copper Canyons These indigenous people have developed the extraordinary ability to run hundreds of miles without rest or injury defying what we typically understand about human endurance McDougall a journalist and an often injured runner himself sets out on a quest to uncover the secrets behind their remarkable abilities In this riveting narrative McDougall takes readers on a journey that spans from cutting edge science labs at Harvard to the sun scorched valleys and icy peaks across North America Along the way he delves into the growing world of ultra runners athletes pushing their bodies to the limits of human performance The book culminates in an unforgettable race in the Copper Canyons where some of the world's best ultra runners compete against the Tarahumara Born to Run combines scientific inquiry adventure and inspiring stories of endurance It challenges the conventional wisdom about running and fitness offering insights that go beyond physical training touching on the mental and spiritual aspects of endurance McDougall's narrative not only sheds light on the Tarahumara's ability to run long distances but also inspires a broader message about the human capacity for resilience and pushing beyond perceived limits The book makes a compelling argument that running is not just an activity but something inherent to human nature an essential part of who we are McDougall's story serves as both an intellectual exploration and an inspiring call to reconnect with our primal ability to run By the end of Born to Run readers are not only educated but motivated to embrace their own running potential realizing that as McDougall puts it we were all born to run
