Challenging Standards Jonathan A. Supovitz, James Spillane, 2015-06-03 The Common Core State Standards are at the center of the latest firestorm in American education reform But this is not the nation s first torrid experience with standards implementation In Challenging Standards Jonathan Supovitz and James Spillane bring together the collective knowledge of top education researchers who have both experienced and investigated education reform challenges in the past Combining both evidence based research and applied knowledge the contributors share with educational leaders their accrued wisdom about implementing standards in classrooms and systems building capacity through relationships and navigating the fractious political terrain Each section of the book contains a set of facilitative questions that will help leadership teams book clubs and professional learning communities connect the chapters to their work

The Core Leigh A. Bortins, 2025-10-16 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can t advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences

Determining the Effectiveness of the Saxon Math Program and the Ready Common Core Program for Students with Disabilities Katie L. Marttila, 2017 For the realm of this study the researcher reviewed two separate mathematics programs that have been implemented within the school district to address both the needs of the students with learning disabilities and the requirements of the local and state assessments The mathematics programs are designed with two different methods to meet the learning needs of the students The Saxon Math program by Houghton Mifflin Harcourt Company aims to teach students using a spiraling method while the Ready Common Core program by Curriculum Associates uses language and standards based methods The programs are expected to help students achieve success at a rate comparable to their peers in reference to standardized assessments This study will look at the effectiveness of the

implemented mathematics curricula designed for the special education students in the learning support classroom in a middle school based on collected data It will review the state achievement rate for both groups using the PSSA Pennsylvania System of School Assessment and also a local standardized assessment called the GMADE Group Mathematics Assessment and Diagnostic Evaluation

Gramsci's Revolution Conrad Riker, 101-01-01 Do you feel society is attacking everything it means to be a man Are you exhausted by the constant push to abandon strength for vulnerability Do you seek a return to clear God ordained roles in a world of chaos This book is your battle standard Inside you will Expose the roots of the cultural decay targeting masculinity Understand the enemy s playbook and how it operates in every institution Reject false labels like toxic masculinity with unshakeable truth Forge emotional toughness that commands respect not pity Lead with authority in your home church and workplace Protect your family from ideological corruption Reconnect with the warrior spirit through timeless rituals Build a legacy that honors God and inspires future generations If you want to reclaim your rightful place as a leader and restore order in a collapsing world then buy this book today

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

Catholic to the Core! Kathy Husak-Tarnacki, 2022-02-17 Catholic to the Core was born out of a restlessness in the heart of the author Since the early 1990s Kathy Husak Tarnacki felt a very distinct call from God to focus her skills and passions regarding education in a way that honored Christ in every way possible The call was so

clear to her that she approached her pastor at the time and asked for permission to open a school within the church She had never been a principal and had never taken formal classes regarding administration but she knew that when God calls he equips And that he did The years that followed were filled with unexpected twists and turns in her professional career and her journey of faith from Catholicism to a non denominational setting then back to the Catholic Church Each step exposed her to new aspects of the possibilities and challenges present when you pursue Christ wholeheartedly as well as highlighting how far schools have fallen from fulfilling their God given purpose These experiences filled her heart and mind with thoughts questions concerns and possible solutions for the lukewarm atmospheres of many of our Catholic schools In 2014 she felt a tugging to begin to write her thoughts down on paper not sure exactly what the purpose would be Now in 2022 she is blessed with the opportunity to publish what she wrote and share it with the hope that it will encourage conversation reflection and determined action

Creating Joyful Classrooms Sarah M. Butzin, 2018-01-15 Creating Joyful Classrooms is a practical response to the malaise in America's schools created by high stakes testing disrespect for the teaching profession and resources being redirected to charter schools and private school vouchers Classroom teachers feel helpless and students feel hapless Joy has left the building This book offers the antidote to return joy and passion to teaching and learning Whether a beginning teacher or a seasoned veteran this book shows the way back to timeless child centered best practices that engage young children and increase academic achievement As joyful classrooms multiply their success will drive out the poisonous rancor of cynicism and despair to become beacons of hope for children everywhere This book also makes the case for changing the status quo in the elementary school The standard traditional grade school is failing to meet the needs of children growing up in the information age Elementary schools must evolve into multi grade multi dimensional safe havens that challenge children academically while remembering to cherish childhood Based upon the theory of invitational education this book provides specific strategies along with classroom management tools to create highly engaging classrooms for young children It also offers inspiring stories of heroic teachers who beat the odds to bring joy back to school It's not too late for a better tomorrow

Math Education for America? Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing

and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest

Charter School Outcomes Mark Berends, Matthew G. Springer, Herbert J. Walberg, 2017-09-25 Sponsored by the National Center on School Choice a research consortium headed by Vanderbilt University this volume examines the growth and outcomes of the charter school movement Starting in 1992 93 when the nation's first charter school was opened in Minneapolis the movement has now spread to 40 states and the District of Columbia and by 2005 06 enrolled 1 040 536 students in 3 613 charter schools The purpose of this volume is to help monitor this fast growing movement by compiling organizing and making available some of the most rigorous and policy relevant research on K 12 charter schools Key features of this important new book include Expertise The National Center on School Choice includes internationally known scholars from the following institutions Harvard University Brown University Stanford University Brookings Institution National Bureau of Economic Research and Northwest Evaluation Association Cross Disciplinary The volume brings together material from related disciplines and methodologies that are associated with the individual and systemic effects of charter schools Coherent Structure Each section begins with a lengthy introduction that summarizes the themes and major findings of that section A summarizing chapter by Mark Schneider the Commissioner of the National Center on Educational Statistics concludes the book This volume is appropriate for researchers instructors and graduate students in education policy programs and in political science and economics as well as in service administrators policy makers and providers
