ABOUT THE CONTRIBUTION PAPER AND ONLINE POST AND VIDEO

Abstract: This article discusses the importance of understanding the role of the family in the development of the child. It is argued that the family is the primary socialization agent for the child, and that the quality of the family environment is crucial to the child's development. The article reviews the literature on the effects of family structure, family process, and family context on child development. It also discusses the implications of these findings for policy and practice.

1991) follow. Furthermore, properties such as clustering with other related genes (Kuparuk et al., 1991; Pomeroy et al., 1991) and the presence of a common first exon (Kuparuk et al., 1991) suggest that these genes are members of a common family. The fact that the genes are clustered in the genome and that they share a common first exon suggests that they are members of a common family.
