Artificial Intelligence: Anthropogenic Nature vs. Social Origin Elena G. Popkova, Bruno S. Sergi, 2020-02-22. This book presents advanced research studies on the topic of artificial intelligence as a component of social and economic relations and processes. It gathers research papers from the International Research to Practice Conference The 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects, May 23-24, 2019, Nizhny Novgorod, Russia, and the International Research to Practice Conference Economics of Pleasure: A Science of Enjoying Economic Activities, October 3-5, 2019, Prague, Czech Republic. Both conferences were organized by the Autonomous Non Profit Organization Institute of Scientific Communications, Volgograd. What sets this book apart from other publications on the topic of artificial intelligence is that it approaches AI not as a technological tool but as an economic entity. Bringing together papers by representatives of various fields of social and human knowledge, it systematically reflects on various economic, social and legal aspects of the creation, application and development of artificial intelligence. Given the multidisciplinary nature of its content, the book will appeal to a broad target audience, including those engaged in developing AI scientific research institutes and universities and industry 4.0 enterprises interested in its implementation as well as state regulators for the digital economy.

Cover Classroom Assessment and Educational Measurement Susan M. Brookhart, James H. McMillan, 2019-07-04 Classroom Assessment and Educational Measurement explores the ways in which the theory and practice of both educational measurement and the assessment of student learning in classroom settings mutually inform one another. Chapters by assessment and measurement experts consider the nature of classroom assessment information from student achievement to affective and socio emotional attributes, how teachers interpret and work with assessment results and emerging issues in assessment such as digital technologies and diversity inclusion. This book uniquely considers the limitations of applying large scale educational measurement theory to classroom assessment and the adaptations necessary to make this transfer useful. Researchers, graduate students, industry professionals and policymakers will come away with an essential understanding of how the classroom assessment context is essential to broadening contemporary educational measurement perspectives.
