Physical Science Pacesetter 2014:

Time Travel Nikk Effingham, 2020-02-20 There are various arguments for the metaphysical impossibility of time travel Is it impossible because objects could then be in two places at once Or is it impossible because some objects could bring about their own existence In this book Nikk Effingham contends that no such argument is sound and that time travel is metaphysically possible His main focus is on the Grandfather Paradox the position that time travel is impossible because someone could not go back in time and kill their own grandfather before he met their grandmother In such a case Effingham argues that the time traveller would have the ability to do the impossible so they could kill their grandfather even though those impossibilities will never come about so they won't kill their grandfather He then explores the ramifications of this view discussing issues in probability and decision theory The book ends by laying out the dangers of time travel and why even though no time machines currently exist we should pay extra special care ensuring that nothing no matter how small or microscopic ever travels in time

Convergence National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Key Challenge Areas for Convergence and Health, 2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships
