Bioprocess Engineering for a Green Environment V. Sivasubramanian, 2018-05-04 Bioprocess Engineering for a Green Environment examines numerous bioprocesses that are crucial to our day to day life specifically the major issues surrounding the production of energy relating

to biofuels and waste management The nuance of this discussion is reflected by the text s chapter breakdown providing the reader with a fulsome investigation of the energy sector the importance of third generation fuels and the application of micro and macroalgae for the production of biofuels The book also provides a detailed exploration of biocatalysts and their application to the food industry bioplastics production conversion of agrowaste into polysaccharides as well as the importance of biotechnology in bio processing Numerous industries discharge massive amounts of effluents into our rivers seas and air systems As such two chapters are dedicated to the treatment of various pollutants through biological operation with hopes of achieving a cleaner greener environment This book represents the most comprehensive study of bioprocessing and its various applications to the environment available on the market today It was furthermore written with various researchers in mind ranging from undergraduate and graduate students looking to enhance their knowledge of the topics presented to scholars and engineers interested in the bioprocessing field as well as members of industry and policy makers Provides a comprehensive overview of bioprocesses that apply to day to day living Is learner centered providing detailed diagrams for easy understanding Explores the importance of biocatalysts and their applications to the food industry as well as bioplastics production Examines the unique capabilities of bioprocess engineering and its ability to treat various pollutants
