Flores, 2016-06-01 Distance Learning is for leaders practitioners and decision makers in the fields of distance learning e learning telecommunications and related areas It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners of all ages using telecommunications technologies of all types Stories are written by practitioners for practitioners with the intent of providing usable information and ideas Articles are accepted from authors new and experienced with interesting and important information about the effective practice of distance teaching and learning Distance Learning is published quarterly Each issue includes eight to ten articles and three to four columns including the highly regarded And Finally column covering recent important issues in the field and written by Distance Learning editor Michael Simonson Articles are written by practitioners from various countries and locations nationally and internationally Distance Learning is an official publication of the United States Distance Learning Association and is co sponsored by the Fischler School of Education at Nova Southeastern University and Information Age Publishing Daily Graphic Ransford Tetteh, 2014-09-19 **The State of the Art in Student Engagement** Carl Senior, 2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy

A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector

Vietnam Studies - The Development And Training Of The South Vietnamese Army, 1950-1972 [Illustrated Edition] Brigadier General James Lawton Collins Jr.,2014-08-15 Includes 2 maps 21 photos In 1954 the Army of South Vietnam was a collection of former French colonial troops with little command experience and no support forces worthy of mention Gradually and despite a considerable degree of political and social instability the Army with strong American assistance was molded into an effective fighting force by the efforts of Vietnamese leaders After 1960 the South Vietnamese Army also acquired a counterinsurgency capability but by 1965 increased political turmoil had undermined its effectiveness and necessitated the intervention of strong US combat forces From 1965 to 1968 while US forces bore the brunt of the fighting the South Vietnamese slowly regrouped and with increasing American advisory assistance and material support once again became an effective fighting force During this period the military provided security for the civilian population and administration and in schools and training centers laid the basis for a larger and more responsive military force The battles of the Tet offensive of 1968 were followed by the general mobilization of South Vietnam and one year later by the decision of the U S to begin troop redeployments These moves set the stage for the third phase in the Army's development Vietnamization The years from 1968 to 1972 saw a great expansion of South Vietnam's territorial security forces and militia and the continual improvement and modernization of the regular Army as it once again assumed complete responsibility for the war effort This monograph covering the three stages in the growth and development of the South Vietnamese Army highlights the role of the US Army especially the MACV advisory system While such a study can do no more than survey these activities it does reflect the deep and continuous commitment by thousands of American soldiers to make the South Vietnamese Army a self sufficient force capable of defending itself with minimum outside assistance
