Razzaque, 2007-03-06 Fibrogenesis Cellular and Molecular Basis is the first volume to provide a synopsis of the rapid progress that has been documented in fibrogenesis over last couple of years which significantly enhanced our understanding of the pathomechanisms of fibrotic diseases Knowledge on molecular and cellular basis of fibrotic diseases has provided opportunities to develop selective and effective gene based therapeutic options The chapters in this book have been selected to provide comprehensive information on fibrogenesis which is not limited to any specific organ Individual chapters present mechanisms of fibrotic diseases involving lung liver kidney heart blood vessels and more The relevance and significance of inflammatory cytokines chemokines transcriptional factors fibrogenic molecules signaling cascade and matrix remodeling in fibrogenesis are explained in depth providing the reader with current and updated information **Understanding Ageing** Robin Holliday, 1995-01-27 This book presents a completely novel approach to the understanding of ageing which many believe is an unsolved problem in biology It explains why ageing exists in animals and reviews our understanding of it at the biological level This includes a discussion of the origins and evolution of ageing The book is not a review of research on

ageing but instead draws on material from a wide range of disciplines including the very extensive biomedical information about age related diseases in humans Understanding Ageing argues that much research needs to be done on the cellular and molecular aspects of ageing if the origins of these diseases are to be understood and their prevention made possible This thought provoking book will appeal to all students and researchers who are interested in ageing whether they are working in the clinical or basic research sphere **MRCOG Part One** Alison Fiander,Baskaran Thilaganathan,2016-10-13 Fully updated to reflect changes to the curriculum and question format since publication of the original edition this book is essential reading for all Part 1 MRCOG candidates A chapter has been added to mirror the new curriculum domain of data interpretation Edited by experienced RCOG examiners and written by contributors to the RCOG s revision course this comprehensive textbook provides extensive coverage of all curriculum areas covered by the Part 1 examination the basic sciences which are vital to the clinical practice of obstetrics and gynaecology Fully illustrated in colour throughout to aid understanding this is the one textbook that every Part 1 candidate should own The content is complementary to RCOG s eLearning programme StratOG <https://stratog.rcog.org.uk> which offers a range of products to support training and professional development in obstetrics and gynaecology including banks of Single Best Answer SBA questions that offer candidates invaluable practice at tackling this demanding examination **Clinical Immunology and Serology** Christine Dorresteyn Stevens,Linda E Miller,2016-10-05 The perfect balance of theory and practice Here s the must have information you need to understand the essential principles of immunology and to master the serology techniques most commonly used in the laboratory Easy to read student friendly coverage focuses on the direct application of theory to clinical laboratory practice preparing you for the real world in which you will practice The 4th Edition of this popular text has been completely updated and revised throughout to reflect the latest advances in the field A brand new full color layout makes the content easier to understand than ever before **Adenosine Receptors** Gyorgy Hasko,Bruce N. Cronstein,Csaba Szabo,2006-07-20 After a century of research several lines of evidence now indicate that the ability of adenosine to directly control inflammatory cells has a major impact on the functions of the inflammatory and immune systems Consequently many promising therapeutic approaches are beginning to emerge that focus on the modulation of adenosine including the development of adenosine receptor antagonists **Holistic Darwinism** Peter Corning,2010-08-15 In recent years evolutionary theorists have come to recognize that the reductionist individualist gene centered approach to evolution cannot sufficiently account for the emergence of complex biological systems over time Peter A Corning has been at the forefront of a new generation of complexity theorists who have been working to reshape the foundations of evolutionary theory Well known for his Synergism Hypothesis a theory of complexity in evolution that assigns a key causal role to various forms of functional synergy Corning puts this theory into a much broader framework in Holistic Darwinism addressing many of the issues and concepts associated with the evolution of complex systems Corning s paradigm embraces and integrates many related theoretical developments of recent years from

multilevel selection theory to niche construction theory gene culture coevolution theory and theories of self organization Offering new approaches to thermodynamics information theory and economic analysis Corning suggests how all of these domains can be brought firmly within what he characterizes as a post neo Darwinian evolutionary synthesis
