Feeding Britain Tim Lang, 2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children s favourite food and internationalized we eat the world s cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the

planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports Feeding Britain argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now Tim Lang has performed a public service Simon Jenkins Sunday Times

NLP is a technology widely penetrating the market irrespective of the industry and domains. It is extensively applied in businesses today and it is the buzzword in every engineer's life. NLP can be implemented in all those areas where artificial intelligence is applicable either by simplifying the communication process or by refining and analyzing information. Neural machine translation has improved the imitation of professional translations over the years. When applied in neural machine translation, NLP helps educate neural machine networks. This can be used by industries to translate low impact content including emails, regulatory texts, etc. Such machine translation tools speed up communication with partners while enriching other business interactions. Deep Natural Language Processing and AI Applications for Industry 5.0 provides innovative research on the latest findings, ideas, and applications in fields of interest that fall under the scope of NLP, including computational linguistics, deep NLP, web analysis, sentiments analysis for business and industry perspective. This book covers a wide range of topics such as deep learning, deepfakes, text mining, blockchain technology, and more, making it a crucial text for anyone interested in NLP and artificial intelligence, including academicians, researchers, professionals, industry experts, business analysts, data scientists, data analysts, healthcare system designers, intelligent system designers, practitioners, and students.

Saving and Investment in the Twenty-First Century Carl Christian von Weizsäcker, Hagen M. Krämer, 2021-06-29

The economy of the 21st century in the OECD countries and in China is characterized by a new phenomenon: the structural surplus of private savings in relation to private investment. This is true even in a situation of prosperity and very low interest rates. On the one hand, this excess saving is due to people's increasing inclination to save in light of rising life expectancy driven by the desire to have sufficient assets in old age. On the other hand, the demand for capital is not increasing to the same extent so that investment is not keeping pace with the rising desire to save. The resulting gap between the private desire for wealth and private investment can only be closed by increasing public debt. This open access book offers a new capital theoretical perspective on the macroeconomic relationship between desired wealth and investment and it presents new empirical data on private wealth and its composition in the OECD plus China area. The authors argue that a free economic and social order can only be stabilized if the wealth aspirations of individuals are met under conditions of price stability. This is not possible without substantial net public debt. A new way of thinking about the economy as a whole is required. By way of an in-depth theoretical and empirical analysis, the book demonstrates this new way of thinking and describes the current challenges facing economic policy. It will appeal to economists and students of economics who are interested in macroeconomic theory and its economic policy implications. An impressive and convincing theoretical dive into the fundamentals behind secular stagnation with very strong implications for actual debt policy. Public debt may be needed to improve welfare. Olivier Blanchard, Senior Fellow at the Peterson Institute for International Economics and Professor of Economics Emeritus at Massachusetts Institute of Technology (MIT), Chief Economist at the International Monetary Fund from 2008 to 2015. Saving and Investment in the Twenty-First Century gives a wholly new perspective on macroeconomics. Weizs

Globalization Anna Kouremenos,Jody Michael Gordon,2020-06-30 Recently complex interpretations of socio cultural change in the ancientMediterranean world have emerged that challenge earlier models Influenced bytoday s hyper connected age scholars no longer perceive the Mediterranean as astatic place where Greco Roman culture was dominant but rather see it as adynamic and connected sea where fragmentation and uncertainty along with mobilityand networking were the norm Hence a current theoretical approach to studyingancient culture has been that of globalization Certain eras of Mediterranean history e g the Roman empire known for their increased connectivity have thus beenanalyzed from a globalized perspective that examines rhizomal networking culturaldiversity and multiple processes of social change Archaeology has proven a usefuldiscipline for investigating ancient globalization because of its recent focus on howidentity is expressed through material culture negotiated between both local andglobal influences when levels of connectivity are altered One form of identity that has been inadequately explored in relation to globalizationtheory is insularity Insularity or the socially recognized differences expressed bypeople living on islands is a form of self identification created within a particularspace and time Insularity as a unique social identity affected by global forces should be viewed as an important research paradigm for archaeologies concerned with re examining cultural change The purpose of this volume is to explore how comparative archaeologies of insularitycan contribute to discourse on ancient Mediterranean globalization The volume s theme stems from a colloquium session that was chaired by the volume s co editors atthe Annual Meeting of the Archaeological Institute of America in January 2017 Given the current state of the field for globalization studies in Mediterranean archaeology this volume aims to bring together for the first time archaeologists working ondifferent islands and a range of material culture

types to examine diachronically how Mediterranean insularities changed during eras when connectivity increased such as the Late Bronze Age the era of Greek and Phoenician colonization the Classical period and during the High and Late Roman imperial eras Each chapter aims to situate a specific island or island group within the context of the globalizing forces and networks that conditioned a particular period and utilizes archaeological material to reveal how islanders shaped their insular identities or notions of insularity at the nexus of local and global influences

Self-Management, Entrepreneurial Culture, and Economy 4.0 Agnieszka Rzepka, Zbigniew Olesiński, Elżbieta Jędrych, 2021-11-01 This book offers practical insight into the changing ways in which organizations operate today Building on a groundbreaking concept of teal organizations the book illustrates the practicality of advocating a lack of hierarchy of predetermined positions and the introduction of roles that come with clear responsibilities constantly defined according to current needs First described by Frederic Laloux a teal organization is a ground breaking approach to managing organizations that is being adopted around the world which turns everyone into a leader This new paradigm rests on the ideas of wholeness evolutionary purpose employee autonomy and self management based on peer relationships Its main assumption is the empowerment of the employee resulting in a change in workplace relationships and a more soulful and purposeful work environment Drawing on the authors research across six different countries it presents the evolution of self management and entrepreneurial culture in the current age of Economy 4.0 and examines how the teal concept has been implemented around the world It examines misconceptions surrounding this novel approach and diagnoses the practical problems connected with implementing it in the current uncertain times It will be of value to researchers academics managers and students in the fields of management and organizational studies

Explaining Religious Party Strength Mário Rebelo,2022-12-30 Explaining Religious Party Strength explores why religious political parties are electorally successful in some countries but not in others Drawing

on insights from political science and sociology this book argues that religious parties are typically formed for defensive reasons reacting against state builders attempts to secularize public services such as education welfare and healthcare Building on these findings the author argues that the strength of religious parties is determined by the infrastructural power of the state Weak states that fail to provide adequate public services open up space for religious communities to build a dense network of private schools hospitals and charities which translates into votes for religious political parties By contrast strong states that provide efficient public services squeeze out private welfare providers undermining the electoral strength of religious political parties The author tests this theory through statistical analysis using a new dataset on all religious parties which have participated in national parliamentary elections between 1800 and 2015 He includes comparative historical analyses of Roman Catholic political parties in France and Italy and Sunni Islamic political parties in Egypt Turkey and Albania This book will interest students and scholars of religion and politics specifically those interested in party formation voting and political activism as well as policymakers
