which may lead to loss of life injury or plant and environmental damage Such systems therefore have to be developed and
implemented so that they meet strict require and security because their applications cover ments on safety reliability nearly
all areas of daily life and range from controlling and monitoring industrial processes through robotics and power generation
to transport systems Highly reliable electronic systems for safety related applications represent an area in which industry
has been involved for many years and which is now gaining increasing importance in academia Their relevance also results
from an increased perception of safety by society Therefore not only are technicians involved in this area but psycho logical
and sociological aspects also play a major role Dealing with safety related systems we have to consider the whole lifecycle of
these systems starting from specification up to implementation assessment and operation All those issues mentioned above
are covered in this book which represents the proceedings of the 14th International Conference on Computer Safety
