,2001-07 *Exchanging the Past* Bruce M. Knaft, 2002-08 Twenty years ago the Gebusi of the lowland Papua New Guinea rainforest had one of the highest homicide rates in the world Bruce M Knaft found then that the killings stemmed from violent scapegoating of suspected sorcerers But by the time he returned in 1998 homicide rates had plummeted and Gebusi had largely disavowed vengeance against sorcerers in favor of modern schools discos markets and Christianity In this book Knaft explores the Gebusi s encounter with modern institutions and highlights what their experience tells us more generally about the interaction between local peoples and global forces As desire for material goods grew among Gebusi Knaft shows that they became more accepting of and subordinated by Christian churches community schools and government officials in their attempt to benefit from them a process Knaft terms recessive agency But the Gebusi also respond actively to modernity creating new forms of feasting performance and music that meld traditional practices with Western ones all of which Knaft documents in this fascinating study **Book Catalog of the Library and Information Services Division:**

Subject index Environmental Science Information Center. Library and Information Services Division, 1977 **Inventorying Cultural Heritage Collections** Sandra Vanderwarf, Bethany Romanowski, 2022-03-14 This two part text opens with an argument few collections practitioners would contest Regular inventories are central to meaningful sustainable and ethical collections preservation and access But Vanderwarf and Romanowski argue that in practice some 25 years working with diverse collections between them inventories are uncommon instead of functioning as a commonplace feature of collections care they tend to be evoked as a last resort when a museum has lost control of its collection Part I offers a flexible project management framework that illustrates strategies for reining in control of collections now From identifying objectives that best serve the collection in question to securing stakeholder support and planning time and resources Part I eliminates some guesswork around what may be an unprecedented and intensive project To maintain the benefits of a project style inventory the authors then encourage practitioners to embrace inventory as an ongoing evolving collections care function that reflects changing professional values and expectations from the communities museums serve By centering computerized databases

barcoding and digital collections the authors further acknowledge these technologies as permanent evolving features of collections and inventory practice that merit increased resourcing Part II gives voice to practitioners around the world through case studies that affirm the vital role of inventories in regaining control of collections Some of these inventories occurred during the course of everyday work while others were responses to natural disasters and armed conflict Still others may be seen as expressions of social justice As much as the authors offer a guide to performing inventories thereby filling a longstanding gap in the literature they invite cultural heritage institutions to rethink how the stories held in collections can be better told and preserved through enhanced inventory practice The book will benefit seasoned museum collections practitioners as well as those who lack access to formal museology education and training The book targets stewards of cultural heritage and material culture collections with varying resources
