clustering in coastal areas The coastal zone has gained a solid reputation as a place vocated for recreational activities and
this is generally related to the presence of the sea The relationship however does not appear univocal or simple the sea can
be perceived as a hostile element by humans and the more general question of whether the presence of the shore is in itself a
favourable repulsive or irrelevant factor to settlement is a debatable point at least for pre industrial societies Back in the
early part of the 19th century Friedrich Hegel regarded oceans and rivers as unifying elements rather than dividing ones
thus implying a trend towards the concentration of human settlements along them The sea he wrote stimulates 1 courage
and conquest as well as profit and plunder although he realized that this did not equally apply to all maritime peoples In
Hegel s view different approaches to the sea were mainly the results of cultural factors and in fact he recognized that some
people living in coastal areas perceive the sea as a dangerous and alien place and the shore as aftnis terrae *Proceedings*

the accessibility of contemporary scholarly research on advances in coastal modeling A comprehensive spectrum of
innovative models addresses the wide diversity and multifaceted aspects of coastal research on the complex natural
processes dynamics interactions and responses of the coastal supersystem and its associated subsystems The twenty one
chapters contributed by internationally recognized coastal experts from fourteen countries provide invaluable insights on the
recent advances and present state of the art knowledge on coastal models which are essential for not only illuminating the
governing coastal process and various characteristics but also for understanding and predicting the dynamics at work in the
coastal system One of the unique strengths of the book is the impressive and encompassing presentation of current
functional and operational coastal models for all those concerned with and interested in the modeling of seas oceans and

coasts In addition to chapters modeling the dynamic natural processes of waves currents circulatory flows and sediment transport there are also chapters that focus on the modeling of beaches shorelines tidal basins and shore platforms The substantial scope of the book is further strengthened with chapters concentrating on the effects of coastal structures on nearshore flows coastal water quality coastal pollution coastal ecological modeling statistical data modeling and coupling of coastal models with geographical information systems
