Operations Management Nigel Slack, Alistair Brandon-Jones, 2019-04-22. Operations management is important, exciting, challenging, and everywhere you look. Important because it enables organisations to provide services and products that we all need. Exciting because it is central to constant changes in customer preference, networks of supply and demand, and developments in technology. Challenging because solutions must be financially sound, resource efficient, as well as environmentally and socially responsible. And everywhere because in our daily lives, whether at work or at home, we all experience and manage processes and operations. The full text downloaded to your computer.
