The Monkeys

In a forest of El Yunque on Puerto Rico, a monkey hangs in the trees. It looks in fangs, curved claws over a long breast, which it hangs upside down for several days at a time. The long legs of the monkey bend in the air as it supports its weight. Long phalanges without sharp claws in its feet, giving the animal a prehensile tail. This helps the monkey hold onto its enemies.

Hardly moves. "Harmless," it moves slowly when it moves at all. The monkey rarely climbs down from the trees. Since it eats mostly leaves and small branches, food is all around. On the ground, the long claws make walking difficult. So it "hangs out" in the lower part of the trees, eating and sleeping.
