Several types of fall from height injuries to construction workers are common, but they are not always preventable. Working from roofs, ladders, scaffolds, and hydraulic excavators, cranes, and other devices that lift workers off the ground are possible causes of a fall. A fall from a height can result in a worker sustaining a head, spinal, or other injury that could be fatal. In fact, according to the Bureau of Labor Statistics, falls are the leading cause of death among construction workers in the United States.
