People's transnational ties and activities are acquiring ever greater importance and topicality in today's world The focus of

this book lies in the complex and multi level processes of migrant transnationalism in four transnational spaces India UK Morocco France and Turkey Germany and Estonia Finland The main question is how people s activities across national borders emerge function and change and how are they related to the processes of governance in increasingly complex and interconnected world The book is based on the findings of a three year research project TRANS NET which brought together internationally acknowledged experts from Europe Asia and Africa As no single discipline could investigate all the components of the topic in question the project adopted a multi disciplinary approach among the contributors there are sociologists policy analysts political scientists social and cultural anthropologists educational scientists and economists The chapters show that people s transnational linkages and migration across national boundaries entail manifold political economic social cultural and educational implications Although political social economic educational transformations fostered by migrant transnationalism constitute the main topic of the book the starting assumption is that the large scale institutional and actor centred patterns of transformation come about through a constellation of parallel processes
