Trade and Labour Standards Anthony Forsyth, 2018-11-21 Mega regional agreements have recently stirred controversy producing a clash between the founding principles of liberalisation and protectionism giving rise to competence issues between the European Union and its Member States Although scholarly work has focused for years on the controversial social clause it is now worth carrying out a detailed legal analysis of the labour standards contained in the mega regional trade agreements adopted and negotiated by the EU and the US The topic gives rise to much controversy as it is influenced by political convictions and election results For this reason it poses one of the most significant challenges to international labour law Based on these considerations this book examines the social dimension of three of the most relevant mega regional trade agreements namely TTP CETA and TTIP It is argued that trade liberalisation should be accompanied by progress in the social and labour field

From Containment to Rationalization Mr. Jean-Jacques Hallaert, Mr. Maximilien Queyranne, 2016-01-21 Achieving France's medium term fiscal targets will require significant expenditure efforts This paper identifies areas where there is scope for increasing expenditure efficiency with a view to achieving higher quality and more sustainable fiscal consolidation The methodology is based on a triple benchmarking First the level of public expenditure in different categories is compared to other European countries Second the impact of spending is assessed against other European countries Third the input mix is analyzed to understand what components are responsible for the level of spending and for the quality of outcomes This is done for various categories of spending and policies Based on these results the paper then provides policy options for expenditure reform in each of these areas drawing on successful reform episodes in other countries

Rules - Limits on Governmental Deficits and Debt Fred L. Morrison, 2016-08-11 This book examines legal limitations on government deficit and debt and its impact on the ability of nations to provide services to their residents. It studies constitutional and statutory limitations as well as those imposed by international treaties and other instruments including those of both the European Union and the International Monetary Fund. The book contains a general report examining the fiscal rules that govern the budgets and expenditures of nation states. The general report is followed by a special report which covers the limits imposed by the European Union and by the smaller group of countries constituting the Eurozone. Ten national reports describing the limits in their respective countries form the basis of the general report. These countries include eight members of the European Union, five of which use the Euro and three of which do not, one other European state and one non-European state. The reports include two countries in which constitutional debt brakes limit national deficit and debt. **Question sociale et citoyenneté** Martin Petitclerc, Louise Bienvenue, David Niget, Cory

Leur violation, comme celle des règles de l'art, sont susceptibles d'entraîner la responsabilité du médecin. Le droit de la responsabilité civile est donc traité de manière approfondie, notamment la problématique des infections nosocomiales, de la naissance d'un enfant non désiré, des conséquences dommageables des vaccinations ou encore de la recherche sur l'être humain. Le volet pénal de ces responsabilités n'est pas oublié. Il est essentiellement axé sur les dispositions relatives à la violation du secret et sur la problématique des faux certificats. La déontologie et le droit disciplinaire de la LPM sont analysés présentant nombre de situations auxquelles les médecins peuvent être confrontés et les conséquences de leurs actes. Enfin, le dossier médical, sa constitution, son contenu et les obligations qui y sont liées font comme les biobanques l'objet d'une large présentation. Le volume III, Raison d'être de toute activité médicale, le patient est largement caractérisé des obligations dont le médecin, les soignants et le patient sont détenteurs. Ce troisième Volume est donc axé sur son statut, ses droits et obligations. Il n'existe pas de patient type, celui-ci se différencie notamment par son statut physique et mental, la pathologie dont il souffre et le cadre dans lequel il évolue.
