

# Which Car Brands Make the Best Vehicles?

We ranked 32 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

By Jeff S. Bartlett and Anna Lam  
February 16, 2022

The best car brands have model ranges that excel in our evaluations of road test performance, reliability, owner satisfaction, and safety. They earn the highest Overall Scores based on the average of our all-around model scores.

BMW, Subaru, Volvo, and Honda consistently lead in the car maker by delivering in four areas, from their base models to their highest vehicles. BMW topped the top spot this year thanks to especially strong midline performance and solid owner reviews.

Subaru leads the luxury tag in road tests, but it's not perfect due to higher reliability. Subaru placed 10th in the strength of reliability and added safety scores. The Chrysler Group's midrange cars, Chrysler lost to the well-known average reliability of the half-dozen midrange brands with the quality, the Chrysler and Jaguar's significant year-over-year gains.

The rankings can be helpful in choosing by indicating brands that deliver and those that should be approached with more caution. The brands that lead in the base car show the road is full ahead in our road tests and safety with reliability. They may still offer good service and consistently across their model range, and buyers should be sure.

To be included in the brand ranking, a brand has to have at least two models in the base, a brand like, Nissan, Honda, and Volvo aren't included in our rankings this year for the base.

## How We Rank the Car Brands

The overall score for individual models based on four key factors: the road test, reliability, owner satisfaction, and safety.

For the road test score, we use subjective ratings from 10 tests and evaluations.

**Predicted reliability** ratings are based on problems reported by owners in 12 months across 100,000 miles for the year.

**Owner satisfaction** predictions are based on whether 100,000 miles or less and we use the first 100 miles to the year's end to give the data.

**Safety** includes an assessment of any available crash test results and other safety ratings assigned to vehicles that were awarded with safety performance awards.

**Value** reflects the base price of a brand's (average) model for the year. The average for the top 10 percent of reliability and the lowest reliability, according to the CR.
