Designing an Efficient Management System Tanachart Raoprasert, Sardar M. N. Islam, 2010-04-15

1.1 Background of the Study Efficiency in Cross Cultural International Business Management Efficient business management is crucial in achieving corporate national or international multinational goals such as higher value, comprehensiveness, corporate governance etc. Efficient business management can be achieved by resolving agency problems existing among different stakeholders in corporations. In international business, agency problems may exist between managers, owners, staff and other stakeholders who come from different cultures. Therefore, there is a need in designing efficient management of international business by understanding the factors, the convergence factors which cause differences in the interests and cultures of different stakeholders. International business refers to all commercial transactions between two or more nations. Because it comprises a large and growing portion of current world business practice, international business has received considerable attention in academic research. Daniels and Radebaugh (1998) International business differs in important ways from business conducted within national borders and poses additional challenges to managers and investors in foreign countries. Mahoney et al (1998). In this context, Black et al (1999) state that effective management is increasingly recognized as a key determinant of success or failure, arguing that the success of international business in multinational companies depends most significantly on the quality of management systems. Stroh and Caligiuri (1998). As international business involves people from different cultures, every business function including managing a workforce, marketing, output and dealing with regulators has the potential to involve cross cultural problems. Zineldin (2007).

Their creativity and subjective initiative could be fully activated and the profit determination would increase if the appropriate motivating methods were utilised. As such, this collection offers detailed insights into these issues. It scrutinises how motivation, leadership, corporate values and organisational identity have an affirmative and significant consequence on organisational citizenship behaviour and corporate human resource management and how organisational identity plays an intermediary role in an organisation.
