Introduction

DISCLAIMER

This document is intended for use by authorized Nokia service centers only.

"Service Schematics" was created with focus on customer care. The purpose of this document is to provide further technical repair information for Nokia mobile phones on used full service centers. It contains additional information such as, "Component finder". The "Signal overview" page gives a good and fast overview about the most important signals and voltages on board. Taking process time and improving the repair quality is the aim of this document. It is to be used additionally to the service manual and other training or service information such as Technical Bulletin.

Measurement was made with following equipment:

Logic Analyzer	• Phoenix version 2004/14.3.126
Oscilloscope	• Fluke PM 1000A/B
Spectrum Analyzer	• Advanced K1132 with an analog probe
Antenna Analyzer / SWR Tester	• Rohde & Schwarz ZNA 200
Multimeter	• Fluke 75 Series 2

While every endeavor has been made to ensure the accuracy of this document, some errors may exist. If the reader finds any errors, Nokia shall be notified in writing.

Please send E-Mail to: casinoware@nokia.com

A NEW FEATURE FOR RM-159, 175

We have redefined these measurement points  which are related to the oscilloscope shown on the signal overview page. As example clicking on the measurement point  guide you to the matching settings on the signal overview page. The next click into the new chosen signal guide you to the related measurement point on the module. Finally, clicking OK, turn into the measurement point  on the module, takes you back to the starting point inside the schematics.

papers and 26 revised short papers presented were carefully reviewed and selected from 60 submissions. The papers are organized in topical sections on gender and cognitive performance, usefulness, usability, accessibility, emotion, confidence, and elderly usability, testing, evaluation, measurement, education, learning, and e-inclusion, design for adaptive content processing, grounded theory, activity theory, and situated action, smart home, health, and ambient assisted living, user-centred design, and usability, practice, interaction, assistive technologies, and virtual environments, communication interfaces, and haptic technology, as well as new technologies and challenges for people with disabilities. Computing and Network Sustainability

H.R. Vishwakarma, Shyam Akashe, 2017-07-05. The book is a compilation of technical papers presented at International Research Symposium on Computing and Network Sustainability IRSCNS 2016 held in Goa, India, on 1st and 2nd July 2016. The areas covered in the book are sustainable computing and security, sustainable systems and technologies, sustainable methodologies and applications, sustainable networks, applications and solutions, user-centered services and systems, and mobile data management. The novel and recent technologies presented in the book are going to be helpful for researchers and industries in their advanced works. *Multimedia Interaction and Intelligent User Interfaces* Ling Shao, Caifeng Shan, Jiebo Luo, Minoru Etoh, 2010-09-11. Consumer electronics (CE) devices providing multimedia entertainment and enabling communication have become ubiquitous in daily life. However, consumer interaction with such equipment currently requires the use of devices such as remote controls and keyboards, which are often inconvenient, ambiguous, and non-interactive. An important challenge for the modern CE industry is the design of user interfaces for CE products that enable interactions which are natural, intuitive, and fun. As many CE products are supplied with microphones and cameras, the exploitation of both audio and visual information for interactive multimedia is a growing field of research. Collecting together contributions from an international selection of experts, including leading researchers in industry, this unique text presents the latest advances in applications of multimedia interaction and user interfaces for consumer electronics. Covering issues of both multimedia content analysis and human-machine interaction, the book examines a wide range of techniques from computer vision, machine learning, audio and speech processing, communications, artificial intelligence, and media technology. Topics and features include: novel computationally efficient algorithms to extract semantically meaningful audio-visual events; investigates modality allocation in intelligent multimodal presentation systems taking into account the cognitive impacts of modality on human information processing; provides an overview on gesture control technologies for CE; presents systems for natural human-computer interaction; virtual content insertion and human action retrieval; examines techniques for 3D face pose estimation, physical activity recognition, and video summary quality evaluation; discusses the features that characterize the new generation of CE; and examines how web services can be integrated with CE products for improved user experience. This book is an essential resource for researchers and practitioners from both academia and industry working in areas of multimedia analysis, human-computer interaction, and interactive user interfaces. Graduate students studying computer vision

pattern recognition and multimedia will also find this a useful reference *Mobile Computing, Applications, and Services* Petros Zerfos, Rebecca Montanari, Thomas Phan, 2010-06-08 This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing Applications and Services MobiCASE held in San Diego California during October 26-29 2009 It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Interactivity WIMUI MobiCASE highlights state of the art academic and industry research work in main topics above the OSI transport layer with an emphasis on complete end-to-end systems and their components Its vision is largely influenced by what we see in the consumer space today high-end mobile phones high bandwidth wireless networks novel consumer and enterprise mobile applications scalable software infrastructures and of course an increasingly larger user base that is moving towards an almost a mobile lifestyle This year's program spanned a wide range of research that explored new features algorithms and infrastructure related to mobile platforms We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America Each paper received at least three independent reviews from our Technical Program Committee members during the Spring of 2009 with final results coming out in July As a result of the review process we selected 15 high quality papers and complemented them with six invited submissions from leading researchers reaching the final count of 21 papers in the program

Dyslexia in the Digital Age Ian Smythe, 2010-03-29 **Pervasive Computing** Jadwiga Indulska, Donald Patterson, Tom Rodden, Max Ott, 2008-05-16 On behalf of the Organizing Committee for Pervasive 2008 welcome to the proceedings of the 6th International Conference on Pervasive Computing The year 2008 was the second time in as many years that the Pervasive conference has attempted to globalize For the second year in a row the conference was held outside of Europe The conference is seen as one of the most respected venues for publishing research on pervasive and ubiquitous computing and captures the state of the art in pervasive computing research In 2008 as in previous years the proceedings present solutions for challenging research problems and help to identify upcoming research opportunities Pervasive 2008 attracted 114 high quality submissions from which the Technical Program Committee accepted 18 papers resulting in a competitive 15.8% acceptance rate There were over 335 individual authors from 27 countries coming from a wide range of disciplines and from both academic and industrial organizations Papers were selected solely on the quality of their peer reviews using a double blind review process The review process was carried out by 38 members of the international Technical Program Committee TPC who are experts of international standing The TPC members were aided by 104 external reviewers It was a rigorous review process in which each paper had at least four reviews three reviews provided by the Committee members and one review written by an external reviewer The reviews were followed by a substantive deliberation on each paper during an electronic discussion phase before the start of the Committee meeting
