Essential Readings in Problem-based Learning Andrew Elbert Walker, Heather Leary, Cindy E. Hmelo-Silver, Peggy A. Ertmer, 2015 This book surveys the state of problem based learning and assesses the impact of this innovative educational methodology on teaching and research effectiveness across a range of disciplines and in a variety of organizational contexts

Planning & Changing, 2016 *An Evaluation of the Relationship Among North Carolina Reading Assessments* Sophia Latrell Crawford-Mapp, 2019 The purpose of this study was to extend the Bowles 2014 study in North Carolina to determine the relationship between the scores of the North Carolina beginning of grade BOG and end of grade EOG reading assessments the scores of the mClass Text Reading and Comprehension TRC assessment and the scores of the CogAT assessment and to determine the degree the TRC CogAT and NC BOG predict scores on the NC EOG reading assessment in third grade classrooms of nine elementary schools This study was conducted in two parts to best address the research questions The first part consisted of descriptive variance and inferential statistics calculated by demographic variables This part described the strength of the relationship between the predictor variable BOG TRC and CogAT and the EOG score on the reading assessment The second part consisted of calculating multiple regression analyses using the assessment scores This part described the predictability of BOG TRC and CogAT to student scale scores on the reading comprehension portion of the EOG This study found that there was a positive correlation and a strong relationship between the NC BOG and NC EOG The NC BOG scores were statistically significant when predicting the NC reading EOG Additionally the second and third grade EOG TRC and the NC EOG had a strong positive correlation and relationship This study will be important for educators to accurately base instructional decisions on existing and newly collected data

Using Teacher Perceptions to Predict Fifth Grade Science and Mathematics Scores in North Carolina Jason Federico, 2016 The purpose of this study was to analyze teachers perceptions of their working conditions and to what extent the perceptions impacted 5th grade students achievement in the areas of mathematics and science in North Carolina The 2014 student achievement data in the areas of 5th grade End of Grade EOG scores in mathematics and science were obtained from one randomly selected school in each of the 115 school districts in North Carolina The perceptions of teachers working conditions were extracted from the 2014 teacher working conditions survey results from each of the same randomly selected 115 schools This correlation study used a stepwise multiple regression model to determine which teacher working conditions indicator Time Facilities and Resources Community Support Manage Student Conduct Teacher Leaders School Leadership Professional Development and Instructional Practices had the strongest predictive relationship to the scores on mathematics and science Student achievement data were reported as composite scores that were calculated by adding the percentage of students who scored a 3 4 and 5 considered grade level on each test This research study will help schools determine which teacher perceptions of working conditions have the strongest predictive relationship to elementary student achievement in mathematics and science

The findings of this research study specified that the indicators in the North Carolina Teacher Working Conditions survey could predict 5th grade student test scores in science and mathematics. The indicators of Managing Student Conduct, School Leadership and Community Support and Involvement were significantly correlated to 5th grade EOG science scores. In addition, a significant correlation was discovered between the indicator of Community Support and Involvement and 5th grade EOG mathematics scores. Overall, the strongest predictive relationship to both science and mathematics scores was from the indicator of Community Support.

Understanding Your Child's End-of-Grade Test Scores North Carolina Department of Public Instruction, Raleigh, 2004

During the final three weeks of the school year, children in North Carolina take the state required multiple-choice North Carolina End of Grade Tests in Reading and Mathematics. The End of Grade Testing Parent Teacher Report provides test scores and information to understand their child's scores. In addition, the End of Grade Testing Parent Teacher Report offers suggestions about how parents can help their child improve in reading and mathematics. Test scores allow parents to compare their child's performance with that of other students in the same grade at the school and with other students across North Carolina. However, test scores should always be considered along with all other available information provided about an individual's child.

A Brief Look at David Holdzkom, Brian Sumner, Brad McMillen, 2010

In the context of standardized testing, the standard error of measurement (SEM) is a measure of the factors other than the student's actual knowledge of the tested material that may affect the student's test score. Such factors may include distractions in the testing environment, fatigue, hunger, or even luck. This means that a student's observed score may be below or above their true level of knowledge. On North Carolina's End of Grade (EOG) and End of Course (EOC) tests, the SEM is usually estimated at 3-4 scale points. Thus, the SEM is often factored into decisions on promotion, retention, and graduation. Students scoring within one SEM of Level III (proficient) are often advanced to the next level. However, the SEM is not factored into school accountability metrics, and students scoring below Level III on an EOG or EOC test are not counted as proficient in the school's publicly reported testing results.

Understanding Your Child's End-of-Grade Test Scores. Grades 6, 7, and 8 North Carolina Department of Public Instruction, 2004

Test scores are among the many ways to find out how well a child is doing in school. Test scores allow parents to compare their child's performance with that of other students in the same grade at the school and with other students across North Carolina. However, test scores should always be considered along with all other available information provided about their child. During the final three weeks of the school year, students took the state required multiple-choice North Carolina End of Grade Tests in Reading and Mathematics. This document is designed to assist parents in understanding the End of Grade Testing Parent Teacher Report.
