Transnational Public Spheres Mohammadbagher Forough, 2024-10-28 This book offers the first systematic theorisation of transnational public spheres from non Western spatial and infrastructural perspectives The current era is characterised by transnational challenges such as climate change pandemics and financial crises that cannot be adequately addressed by national public spheres Public spheres defined as arenas of collective communication and action are the cornerstone of any people centred system of governance This book puts forward a transnational public sphere theory and focuses on spatial infrastructural and non Western perspectives thus adding to the public sphere theory and practice at both national and transnational levels The author offers a new conceptual construct the right to space as a way of transnationalising the theory and addressing its efficacy issues Providing conceptual clarity on the public private distinction this book examines the historical roots of the public sphere in both Asia and Europe establishes the methodological and ontological foundations for a theory of transnational publics and analyses contemporary empirical instances of transnational publics in both Asia and the West This transnationalisation is crucial now that authoritarianism is on the rise and democracy is in decline worldwide A timely addition to the literature this book will be of interest to researchers in international relations political science political theory sociology media and communication cultural and literary studies and Asian studies

Offbeat Physics P.I.C. Teixeira, 2022-04-28 Offbeat Physics Machines Meditations and Misconceptions is a collection of articles on various topics in classical physics that have intrigued the author and their students throughout the years The book is divided into three parts Part I Machines comprises chapters that explain or model the workings of a number of machines understood in a broad sense on the basis of physical principles These machines can be as simple as a rolling wheel or as complex as a jet engine Then in Part II Meditations the authors go beyond the standard examples experiments and

approximations discussed ad nauseam in most physics textbooks but which are not always very exciting or realistic For example what happens when colliding bodies are not perfectly rigid as we know real bodies are not Finally Part III Misconceptions aims to correct misconceptions that students may have about physical phenomena or clarify issues that are often presented misleadingly confusingly or imprecisely in textbooks such as the relationship between angular momentum and angular velocity in rotational motion This is a book for all those who wish to learn physics beyond the textbooks and from more realistic problems often occurring in engineering contexts It will be useful to instructors at all levels as well as highly motivated students taking General Physics courses in higher education

Least Action Principle of Crystal Formation of Dense Packing Type and Kepler's Conjecture Wu Yi Hsiang,2001 The dense packing of microscopic spheres i.e atoms is the basic geometric arrangement in crystals of mono atomic elements with weak covalent bonds which achieves the optimal known density of B 18 In 1611 Johannes Kepler had already conjectured that B 18 should be the optimal density of sphere packings Thus the central problems in the study of sphere packings are the proof of Kepler's conjecture that B 18 is the optimal density and the establishing of the least action principle that the hexagonal dense packings in crystals are the geometric consequence of optimization of density This important book provides a self contained proof of both using vector algebra and spherical geometry as the main techniques and in the tradition of classical geometry

Feminist Periodicals and Daily Life
Barbara Green,2017-10-03 This volume uncovers the ideas concerning everyday life circulating in the burgeoning feminist periodical culture of Britain in the early twentieth century Barbara Green explores the ways in which the feminist press used its correspondence columns women's pages fashion columns and short fictions to display the quiet hum of everyday life that provided the backdrop to the more dramatic events of feminist activism such as street marches or protests Positioning itself at the interface of periodical studies and everyday life studies *Feminist Periodicals and Daily Life* illuminates the more elusive aspects of the periodical archive through a study of those periodical forms that are particularly well suited to conveying the mundane Feminist journalists such as Rebecca West Teresa Billington Greig E M Delafield and Emmeline
