A World Without Email Cal Newport, 2021-03-02 A New York Times and Wall Street Journal bestseller From New York Times bestselling author Cal Newport comes a bold vision for liberating workers from the tyranny of the inbox and unleashing a new era of productivity Modern knowledge workers communicate constantly Their days are defined by a relentless barrage of incoming messages and back and forth digital conversations a state of constant anxious chatter in which nobody can disconnect and so nobody has the cognitive bandwidth to perform substantive work There was a time when tools like email felt cutting edge but a thorough review of current evidence reveals that the hyperactive hive mind workflow they helped create has become a productivity disaster reducing profitability and perhaps even slowing overall economic growth Equally worrisome it makes us miserable Humans are simply not wired for constant digital communication We have become so used to an inbox driven workday that it's hard to imagine alternatives But they do exist Drawing on years of investigative reporting author and computer science professor Cal Newport makes the case that our current approach to work is broken then lays out a series of principles and concrete instructions for fixing it In A World without Email he argues for a workplace in which clear processes not haphazard messaging define how tasks are identified assigned and reviewed Each person works on fewer things but does them better and aggressive investment in support reduces the ever increasing burden of administrative tasks Above all else important communication is streamlined and inboxes and chat channels are no longer

central to how work unfolds The knowledge sector s evolution beyond the hyperactive hive mind is inevitable The question is not whether a world without email is coming it is but whether you ll be ahead of this trend If you re a CEO seeking a competitive edge an entrepreneur convinced your productivity could be higher or an employee exhausted by your inbox A World Without Email will convince you that the time has come for bold changes and will walk you through exactly how to make them happen **Lumber World Review** ,1926 **Conducting Research with Human Participants** Nathan Durdella,2022-02-15 Conducting Research with Human Participants An IRB Guide for Students and Faculty by Nathan Durdella is the only guidebook students and faculty will need to navigate the IRB process and secure swift approval of research protocols This book serves as an advisor to walk researchers through all the details of drafting submission and revision of materials for Institutional Review Boards so they can complete their research projects or dissertations faster This text walks readers through the history of Institutional Review Boards the contemporary context of ethical research strategies to effectively draft submit and revise an IRB protocol and guidance on working with an approved protocol in the field The latest updates to the Common Rule and other regulatory frameworks including special protections for working with vulnerable groups are covered throughout the text Not every research project goes according to plan so adverse events and reporting receive special coverage A final chapter on ethical research practices beyond IRB compliance encourages researchers to think through how to exit the field of research and ensure their research benefits the individuals families and communities in which they work Take the guesswork out of the IRB process from start to finish with this handy guide
