

Year 7 CAT Test Format

TEST BATTERIES EXPLAINED

VERBAL REASONING

Verbal Classification – These questions show us three words that are connected.

Verbal Analogies – The first pair of words have a special relationship in verbal analogy questions.

NON-VERBAL REASONING

Figure Classification – The Figure Classification questions show three pictures that share a connection or a characteristic.

Figure Matrices – Matrix questions are 2x2 or 3x3 matrices with different pictures.

QUANTITATIVE REASONING

Number Analogies – Identify the relationship between the numbers in the first two pairs to determine the missing number in the third pair.

Number Series – Select a number that can replace the question mark to continue the series.

SPATIAL ABILITY

Figure Analysis – you are presented with a piece of paper folded several times and then punched with holes. You need to determine which of the choices is the final unfolded punched-in paper.

Figure Recognition – Figure Recognition questions present a shape alongside five answer choices containing complex designs. You must choose a design which contains the target shape in the same size and orientation.

Underachievement in Schools Emma Smith, 2005-06-09 Underachievement in school is one of the most widely used terms in education today As a discourse it has been responsible for influencing government policy staffroom discussions as well as the pages of academic journals and the TES It is also a subject which raises questions about what we expect from a fair and equitable education system This book provides a critical analysis of two sides of the underachievement debate at each of the three levels of focus international the UK and the individual On the one hand it will consider the crisis account of falling standards and failing pupils and on the other present an alternative account which urges a re evaluation of the underachievement debate in order to consider who might be underachieving and why Children, Schools, And Inequality Doris R Entwisle, 2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children s development Children Schools and Inequality redresses that imbalance It examines elementary school outcomes e g test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children s school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Entwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development **8 Practice Tests for Reading and Math** Michael Priestley, 2002 Help your students do their best on standardized tests in reading and math by familiarizing them with the skills formats and language they need to succeed These practice tests are designed to look and read like state and national tests such as the CTBS TerraNova ITBS MAT TAAS
